PARIS. Nov. 5 (Reuters) - A reports that will be publicly pre-Uoesco report, shelved amid coo- sented to the general conference are troversy, has determined that Israel Unesco-edited versions of annexes has not committed "cultural to Mr. Henry's report. They were aggression" against Arabs living in written individually by other members of the fact-finding mission.

U.S. delegates to Unesco several times have challenged Director General Amadou Mahtar M'Bow at public sessions to produce the full report. Mr. M'Bow bas said the report is not satisfactory and that the mission's brief did not oblige him to publish its findings. Sources close to the organization said that Mr. M'Bow considered the report "too political."

In criticizing the impact of the Israeli occupation on Arab educa-tion and culture, the Henry report says that "the requirements of military security lead to repressive measures" and "impose a series of constraints which manifestly pre-vent the free exercise of an inde-pendent cultural life."

Mr. Henry wrote that "it seems quite clear that the standard of education in the occupied territories is not as good as it could have been in normal circumstances, and that the prevailing situation is not favorable to the normal running of the educational system."

### No Violations Found

But he added: "The mission received a positive impression from the majority of the schools visited in the West Bank and Gaza . . . The mission (was) unable to detect any violations, restrictions or ob-(Continued on Page 2, Col. 4)

He complained that the delegation had flown to Cairo "without permission or arrangement" and that be learned of the trip through

news agency reports.

Mr. Sadat also objected that the overture had not been made at the summit level, which would be customary procedure. After his speech, Mr. Sadat told reporters that "I am not prepared to receive anybody except presidents and kings." If other heads of state wished to approach him, he said, "I am prepared to receive them, welcome them, sit down and hold discussions with them."

As it was, the delegation's com-position hardly reassured the Egyptians. Mr. Hoss has been faulted bere for letting Syrian troops stay in Lebanon. Mr. Iskander and Mr. Aziz represent countries with which Cairo broke relations last December. Only the foreign minister of the United Arah Emirates was likely to be viewed without suspicion.

Mr. Sadat's refusal to let even his subordinates meet the delegation suggested that be considered the visit little more than a tactic designed to put him on the defensive and that he upstaged the ploy by refusing to bave anything to do with it. The authoritative newspa-

### Arab Summit On Sadat Ends

BAGHDAD, Nov. 5 (AP) -A 20-nation Arab summit con-ference ended tonight after four days of wrangling over what sanctions to impose on Presi-dent Anwar Sadat of Egypt for his peace initiative with Israel.

President Ahmed Hassan al-Bakr of Iraq said that the dele-gates reached positive results. Conference sources said that the Saudi Arabia delegation, head-ed by Crown Prince Fahd, led the resistance against strong condemnation of Mr. Sadat.

It had been reported earlier that consideration was being given to enting off all Arab fi-nancial aid to Egypt and to re-moving the beadquarters of the Arab League from Cairo.

tonight after rampaging anti-shah rioters paralyzed Iran's capital, burning banks, botels, movie the-aters and office buildings and at-tacking the British Embassy. Foreign Minister Ali Amini, a takeover.
The state-controlled radio, which

possible successor to the outgoing Premier, was scheduled to meet soon with Shah Mohammed Reza Pahlavi. There were reports, however, the new head of government in-stead might be a military man. As Iranian Army troops looked

By William Claiborne

TEHRAN, Nov.5 (WP) - Premier Jaafar Sharif-Emarni resigned

on, mobs of enraged youths roamed through the city at will, burning and sacking scores of buildings and burning automobiles in an eight-hour spree of violence. Thick black smoke bung over the

city, as thousands of Iranians indicated support of the rebellion by turning on their car headlights, sounding their horns and driving through the streets shouting "Death to the shah."

### 2 Ministers Resign

It was the first time since the current disturbances began that a cross-section of middle-class Iranians in large numbers had openly expressed support for the over-throw of the sbah's government.

Two ministers - the beads of education and science - resigned earlier today in protest over govern-ment actions during the crisis. The two Cabinet ministers were

Education Minister Manouchehr Ganji, who complained of government weakness during the crisis, and Higher Education and Science Minister Abulfazi Qazi Shariat-Panahi, who protested shootings yesterday at Tehran University.

Officials of the opposition Iranian National Front, which has a shadow cabinet prepared to step in as a provisional government, sug-gested that the army had deliberately allowed the situation to get out of hand today to make a wholesale crackdown more palatable to

[Political sources in Tehran said a government change became "ex-tremely likely" after reports from Paris that exiled leader Ayatollah Rubollah Khomeini had wou moderate National Front leader Karim Sanjabi to his side. United Press International said. Both issued a joint communique rejectiog compromise with the shah's regime and urging his abdication, the reports added.]

### Soldiers Stand Aside

As thousands of anti-shah demonstrators poured out of Tehran University's downtown campus and beaded for the central business district, many of them carrying wooden spades and rocks, heavily armed soldiers stood at key intersections and watched the parade

During the beight of the riot, when buildings were being burned and botels attacked and the Iranian Office of Public Information looted and burned, the army made only sporadie attempts to disperse the crowds and protect the buildings. During the entire siege, not one fire engine responded to the blazes. which were either allowed to burn uncontrolled, or were battled by private citizens.

However, shortly before a 9 p.m. curfew took effect, heavily armored army units rolled into the central district and troops sanned out through the main streets chasing away the few remaining protesters.

Several British-made Chieftain lanks were brought into the area, and automatic-weapons fire could be heard from the west end of the stationed near the Iranian radio and television building to prevent a

### Chinese Leader Seeks New Diplomatic Gains

### Teng Begins Mission to Southeast Asia

By George McArthur

BANGKOK, Nov. 5 - Having made an impressive success in his tour of Japan, China's Deputy Premier Teng Hsiao-ping began a three-nation tour of Southeast Asia today with prospects for new gains despite the Communist cold war disrupting the region.

ence of 1954 has a ranking member of Pekiog's Politburo ventured so boldly ioto Southeast Asia. The ambitious goal is to clearly demonstrate that China wants friends, and has them, oo its vital southern

As Mr. Teng landed in Thailand to start his 11-day, three-nation diplomatic offensive, however, his rivals were working to prejudice the our. The Communist cold war aligning China and Cambodia against the Soviet Union and Vietnam was escalating ominously.

Although the details of military clashes on the China-Vietnam border were obscured by the shrillness of propaganda from both sides, it appeared that they were growing in seriousness and bloodshed.

### Rising Stakes

The stakes were also going up in the Vietoamese-Cambodian war, as Vietnam charged that China has now sent 100,000 troops to help Cambodia. That figure was dismissed as ridiculous by Western intelligence analysts. They believe that China has about 20,000 "technicians" in Cambodia, but even that figure is ominous enough. The fate of 20,000 Chinese would raise serious questions should the Vietnamese launch a major dry-sensor offensive late this month, as many

The stakes were also raised by

sionable material for weapons, but

it was practically the last thing on

the signing to Moscow last week of a friendship treaty between the So-viet Union and Vietnam that included military assistance clauses.

The treaty gives the Soviet Union, for the first time, a formal military commitmeet to take "appropriate measures" in defense of

The treaty, plus an escalating paganda campaign from Moscow and Hanoi, were evidently timed to cast a shadow over Mr. Teng's travels through Thailand, Malaysia and Singapore.

The initial reaction to the treaty was one of apprehension in ASEAN — the Association of Southeast Asian Nations linking Thailand, Malaysia, Singapore, Indonesia and the Philippines, whose combined populations are 232 mil-

tion. The ASEAN group's stated (Continued on Page 2, Col. 1)

Hanoi, Peking Charge Raids

### China, Cambodia Assail Vietnam in Soviet Pact

BANGKOK, Nov. 5 (AP) — China and Cambodia have charged Vietnam with being a tool of the Soviet Union by Hanoi's signing with Moscow their first treaty of friendship and corneration. friendship and cooperation.

The Chinese news agency charged yesterday that Vietnam was preparing for large-scale aggression against Cambodia and that Moscow was supporting such a

move through large shipments of arms and war materiel to Vietnam. Cambodian radio said that Vietnam aligned with Moscow to secure aid because of recent flooding, and that the flow of arms, aircraft, tanks and other equipment to Vietnam continued. The broadcast claimed that the Soviet Union had some military installations in Viet-

### Corpses Not Returned

Vietnam today rejected China's demand that it return the bodies of six Chinese killed in border fighting last week. It said that it bad buried them in Vietnam.

Vietnam radio, monitored in Bangkok, said that the China refused to accept the corpses and demanded that Vietnam relinquish them at a place 13 kilometers inside China.

China yesterday accused Vietnam of attacking a Chinese border commune, wounding 12 commune members and militiamen, kidnapping eight and later killing six of se kidnapped last Wednesday in the Tinghao hill area. The Chinese news agency said

that the Viennamese authorities have rejected Chinese demands to return the kidnapped and the bodies of the six.

Vieunam's version of the incident was radically different from Chino's Hanoi claimed that Chinese troops entered Vietnam in Cao Lang province and that thousands of soldiers were moved as reinforcements to the troubled bor-

The Soviet Union and Vietnam on Friday pledged to take appro-priate measures together in event of an attack against either country. The pledge was included in a 25-year treaty of friendship and coop-

Border tensions in Indochina and diplomatic maneuverings in the region have increased in recent weeks against the backdrop of the Chinese-Soviet rift, a border war between Vietnam and Cambodia and reported clashes on the Chinese-Vietnamese frontier.

### Claim of Rebels

Viernamese official media, quoting recent Cambodia refugees, said yesterday that all of Cambodia's major cities bave been surrounded by antigovernment rebels ready to topple the central government.
Western intelligence sources have said that Vietnam has been

arming and using some of the rebel groups but there has been no evidence — only Vietnamese official media claims — that the insurgents are ready for decisive attacks. U.S. intelligence sources in Washington have recently noted a major Vietnamese build-up on the

### U.S. Kept S. Korea From Making A-Arms ually would have given them fis-

By Robert Gillette

LOS ANGELES, Nov. 5 - U.S. intelligence analysts concluded in early 1975 that South Korea was moving rapidly to acquire materials, equipment and expertise that would enable it to build unclear weapons, and they strongly suspected that Seoul was engaged in a clandestine atomic-bomb program, according to past and present gov-ernment officials.

Acting on that assessment, the Ford administration brought heavy diplomatic pressure on South Korea in what officials now contend was a successful effort to quench Seoul's nuclear ambitions.

According to sources familiar with the episode, the U.S. govern-ment at one point threatened in effect to bring South Korea's civilian nuclear power program to a halt by blocking the sale of reactors or-dered from Westinghouse Corp. and by persuading Canada to suspend negotiations for a similar

By the end of 1975, the source said, South Korea had agreed to re-frain from taking further steps toward a nuclear-weapons capabili-

### Ford Officials Threatened to Bar Sale of Reactors to Seoul in '75

We lelt we reached a good understanding that this would be discontinued, that we turned it around," a former Ford adminis-tration official said in a telephone interview. "This was one of the first successes of our nonproliferation

### Sales Permitted

As part of the understanding, sales of power reactors and urani-um fuel were allowed to proceed. In addition to two small U.S-supplied research reactors already in operation, South Korea started up its first nuclear power plant, a 595-megawatt Westinghouse unit, last April. Three more Westinghouse reactors are under construction, as is a Canadian-supplied Candu pow-

South Korea has depended heavily on the United States not only for nuclear reactors and fuel but

1977, issue of the journal Interna-tional Security said that the U.S. Export-Import Bank had provided South Korea with \$275 million in direct low-interest loans, and another \$227 million in loan guarantees for reactors and fuel. By 1977, direct U.S. grants to South Korean nuclear research programs were re-ported to total \$437,000, and 272 Korean technicians were said to have been trained at U.S. expense.

According to a variety of sources, South Korea's efforts to develop a nuclear weapons capability ex-tended well beyond its widely publicized plan to buy a nuclear fuel reprocessing plant from France in order to extract plutonium from spent reactor fuel, ostensibly for the purpose of recycling it in reac-tors. Under heavy pressure from the United States, Seoul withdrew from the deal in January, 1976, amid criticism from Europe that olso for the financing of its power the United States had engaged in program. An article in the spring, strong-arm tactics and "blackmail."

the list of things they needed, from special machine tools to the nonnuclear components of weapons," a government arms-control analyst said. "They were running all over the world picking up material and equipment. It was enough to make everybody extremely suspicious." Strategy analysts consider the Korean Peninsula to be one of the world's most volatile trouble spots, The United States maintains tactical nuclear weapons there as a deterrent to a North Korean invasion. but they are beld under the control of the U.S. military. The appearance of South Korean nuclear

> would dangerously destabilize the region and increase the likelihood of a confrontation between the great powers. ### Russians Warn of Chill In Soviet-U.S. Relations

By Kevin Klose

MOSCOW, Nov. 5 (WP) — The and warned that the case could Soviet Union has demanded the have a chilling effect on Soviet-immediate repatriation of two conimmediate repatriation of two convicted Soviet spies from the United States, denounced their 50-year prison sentences as "monstrous,"

### Teng Begins by a U.S. District Court judge in New Jersey. The two men, both Soviet employees of the United Nations, were convicted last month **Asian Tour**

(Continued from Page 1) goal is to bring about some form of neutrality for the region, an idea that Mr. Teng has already embraced. But the formal linking of Vietnam to the Soviet bloc will

make that more difficult. "The rivalry between East and West is being replaced by the rival-ry between East and East, said a

harried Thai official involved in preparing for Mr. Teng's visit. Despite diplomatic dueling, the Despite diplomatic dueling, the prospect is that Mr. Teng will make substantial progress on his tour. It is ironic that he will be picking up the old threads of a good neighbor policy enunciated at Bandung a quarter of a century ago by his late mentor, Chou En-lai. Another ironic that Mr. Teng ago 24 and the my is that Mr. Teng, now 74 and the master-survivor of party struggles, is regarded diplomatically as the face of a new China.

### Looking to China

With the diminished U.S. role in Southeast Asia and the growing Soviet alliance with Vietnam, the non-Communist nations of the area are openly looking to China to belp maintain the balance within the region. This is true even of Indonesia and Singapore, which have not yet restored diplomatic relations with China, a situation that has oot affected Mr. Teng's visit to pragmatic Singapore.

The Communist insurgency in Thailand will certainly be brought to Mr. Teng's attention on the third day of his visit, when he will be tak-en to the Special Warfare School for a military review.

China's support for the regime of Cambodian Premier Pol Pot is even viewed sympathetically. The Southeast Asian states would like to see stability rather than confrontatioo in Cambodia and they view the policies of Vietnam with great skepticism.

the situation, the time is ripe for Chinese diplomacy in the area, and Mr. Teng has only to smile his way through ritual functions and avoid pitfalls to insure success.

O Los Angeles Times

Chinese Group in Cambodia BANGKOK, Nov. 5 (AP) - A high-level Chinese delegation was due today in the Cambodian capi-tal of Phnom Penh, where the radio said they would be welcomed as brothers and war comrades.

The official Cambodian radio said the Chinese delegation is led by Wang Tung-hsing, deputy chair-man of the Communist Party's Central Committee, accompanied by Deputy Premier Yu Chiu-li.

### Sadat Defies Arab Heads

(Continued from Page 1) per Al Ahram confirmed today in an editorial that the Baghdad conference chose "a wrong way to deal with Egypt." Nonetheless, the response

seemed likely to widen Egypt's breach with the rest of the Arabs by undercutting the moderates at Baghdad who had wanted to forestall the adoption of a tougher majority line toward Egypt. One Westanalyst here speculated that Mr. Sadat may have concluded that the Baghdad summit could not dn him any serious barm and opted for defiance to score some psychologi-

cal points. Mr. Sadat bas been particularly contemptuous of the efforts by Arab hard-liners to punish Egypt for negotiating with Israel. Last oight, he dismissed Iraq's proposal of n \$5 billion aid fund for Egypt if it dropped its peace plans. Mr. Sa-dat said that "all the millions of the whole world cannot buy Egypt."

### Castro Initiative

The idea of a "dialogue" between night were the first by the Russians Mr. Castro and Cubans living in since the sentences against Valdik Enger, 39, and Rudolf Chernyayev, nther countries was enunciated by the Cuban leader Sept. 6 in a meet-

ing with foreign reporters.

Mr. Sanchez Parodi said he had called the press conference to reaffirm and restate as clearly as possi-ble that the Cuban government wants to set up broad programs for the possible release of most of 3,000 political prisoners, the reunification of families and visits to

Several sources said Mr. Sanchez Parodi's first press conference here appeared to be an attempt to emphasize in the most dramatic way that Cuba wants to decrease tensioo and bostility with the commu-nity of overseas Cubans.

Sources also said Mr. Sanchez Parodi's statement appeared to be an attumpt to convince the United States that Cuba is serious about improving relations with the U.S. government as well as with the exiles . It is the first time the Cuban Interest Section has taken an active public role in broadcasting Cuban government policy.

### Varied Attitudes

He said the Cuban government recognized that attitudes toward it among Cubans living abroad vary widely and there is oo single spokesman or representative group.
Cuba is oot expecting the U.S. Cuban community to hold a referendum or election to choose representatives, but wants to sit down with a variety of leaders - other than those representing "terrorist activities" -- to develop a systematic approach to the three problems, he said,

The commentator appeared with Soviet diplomat Vladimir Zinyakin. Mr. Zinyakin was arrested last May He said the discussions should be with Enger and Chernyayev, but viewed as involving only the Cuban was released because he had diplogovernment and persons of Cuban origin people living abroad. They would be "parallel to" but not di-rectly linked to any government-tomaric immunity, which the other two, as UN employees, are not ac-corded in the United States. Mr. Zinyakin — who has been quoted by Tass in recent weeks denouncing the trial — reiterated his remarks for the national audience. government discussions with the United States oo improvement of relations and the settlement of problems between the governasserting that FBI "gaugsters" yanked the three from a car, shouted obscenities, handcuffed them and terrorized them with a "Colt

### Israeli Cabinet Prolongs Debate Of Peace Treaty

JERUSALEM, Nov. 5 (UPI) --The Israeli Cabinet discussed military and political aspects of the Israeli-Egyptian peace treaty for six hours today, and Deputy Prime Minister Yigael Yadin said "many more meetings" could be expected

before the pact is approved.

Mr. Yadin said that the Cabinet would meet again tomorrow, delaying the return to Washington of Defense Minister Ezer Weizman. He indicated that it could take the Cabinet some time to give official approval to the peace pact.

He said that Mr. Weizman Leo Sonner, manager of the Dow Chemical Co. office in Moscow, briefed the Cabinet on the oearly completed military annex to the treaty being negotiated in Washing-ton. Mr. Weizman, who along with Foreign Minister Moshe Dayan is representing Israel at the talks, also reported on the overall negotiations, including Prime Minister Menachem Begin's meeting with Secretary of State Cyrus Vance in New York last week.

The press reported bere from Washingtoo that the wording of the body of the treaty has been completed and the preamble has ocarly been completed.

Housing Minister Gideon Patt said that Israel would need \$3.5 bil-lion to cover the cost of withdrawal from the Sinai - above and beyoud Israel's standing request of \$1.8 billion in U.S. military and

### Turkey, U.S. Discuss Joint Arms Projects

ANKARA, Nov. 5 (Reuters) — U.S. Defense Department officials arrived tonight for two days of talks on cooperation between the United States and Turkey in pro-

ducing military equipment. Turkey wants to build up its defense industry to move away from reliance on the United States and to save foreign exchange, and government leaders have suggested joint production projects. The Ankara talks are part of efforts to develop a new relationship after the U.S. Congress repealed its arms embargo against Turkey in Septem-

### Pope Reschedules Conference Of Latin American Bishops

VATICAN CITY, Nov. 5 (AP) — Pope John Paul II has rescheduled the Latin American Episcopal Conference in Puebla, Mexico, to run from Jan. 27 to Feb. 12, the Vatican announced

The conference originally had been set to begin Oct. 12, but it was postponed because it conflicted with the conclave to elect the successor to John Paul L

The Vatican announced that the pope also retained all top officials of the conference — Cardinals Sebtastiano Baggio and Aloisio Lorscheider and Mexico City's Bishop Ernesto Corroio Ahumada as presidents and Bishop Alfonso Lopez Trujillo of Colombia as

secretary general. There was no word on whether the pope would attend the third

gathering of Latin American bishops.

Meanwhile, the pope paid a two-hour visit today to the tomb of Italy's patroo saint, Francis of Assisi, and prayed for his intercession for his pontificate. The pope traveled 50 minutes by helicopter to the hilltop medieval city of Assisi. In an open-air address, the pope asked whether the second coming of Christ was near because of the proximity of the year 2,000.

In a departure from his text, the Pope said: "You can see this is no longer the church of silence." After a crowd of thousands roared its approval, the pope added: "St. Francis must be listening."

On the accusation that Israel was committing "cultural aggression" against the Arabs under its military rule, the report said: "Generally speaking the policy fullowed seems to stem from considerations of security rather than from a deliberate desire to undermine the foundstions of Arab culture."

The Uoesco-edited annexes that have been made public have raised secondary disputes. Israel says that only the critical parts were published. The editing was done by the head of Unesco's education department, a Soviet citizen.

Ibrahim Souss, the Palestine Liberation Organization representative to Unesco, said that be is satisfied with the documents that have been published and has no plans to get into a controversy vover Mr. Henry's report, which he describes as "slightly pro-Israeli."

ger saw the demonstrators coming, and took large portraits of the shah and the royal family and threw them to the sidewalk and trampled them to the cheering of the crowd. However, some youths rusbed into the lobby anyway and smashed windows and furniture.

In numerous office buildings, however, employees needed no such inducement, and threw pictures of the imperial family out of windows to express their own senti-

attack said a crowd went to the gate of the compound, smashed windows of a gatehouse and went into the four-story building, warning employees to leave before they set a fire. The building was damaged by the blaze, and another fire reportedly broke out in a garage at the nurth end of the compound.

The oearby U.S. Embassy was protected by Iranian troops stationed at both ends of the boulevard in front of the compound. At a government office building

on the northern edge of the busioess district, bureaucrats and pro-testers joined together to try to re-move a large seal bearing the like-oess of the shah. They threw a rope around it and tried to tear it down but were interrupted when a truck load of soldiers arrived. Later they returned and removed the seal stamping on it and shouting antishah slogans.

Throughout the day, Iranian soldiers interrupted similar small ges-tures of hatred for the shah, as some of them even stopped cars and flailed at the headlights that were lighted as an expression of support for the rebels.

However, the troops seemed to

deliberately avoid crossing the paths of the protesters, and many fewer soldiers were on the street than on Sept. 8, when hundreds of demonstrators were shot at in a confrontation and others smashed the windows of some banks.

"The shah is finished, write that," said one youth to a reporter,

smiling broadly and running his finger across his throat. Meanwhile, labor strikes spread

throughout the country, as workers continued to demand an end to martial law and freedom for all po-

At Least 230 Million Tons, Kosygin Says

# Record Soviet Grain Harvest Forecast

By Craig R. Whitney

MOSCOW, Nov. 5 (NYT) - The Soviet grain harvest this year will be the largest in history, more than 230 million metric tons, Premier Alexei Kosygin announced in a Kremlin speech yesterday.

The harvest would exceed the previous record of 223.8 million tons, set in 1976, by more than 6 million tons, and would be well over the planned 1978 figure of 220.1 million tons. Last year, bad weather in the harvest season caused a shortfall and the total was only 195.4 million metric tons. A metric tons is 2,205 pounds.

The recovery this year, Mr. Ko-sygin said, was achieved by hard work in spite of some cold and wet weather during the growing season. The problem for the rest of the year, he said, would be to make sure that the grain and other crops get to the consumer in good shape a movement not guaranteed here in past years.

Mr. Kosygin disclosed the projected harvest figure, which he said.

was based on "preliminary data," in a formal speech in the Kremlin's convention hall marking the 61st anniversary of the Nov. 7 Bolshevik revolution.

### Slight Effect Seen

The effect on grain markets in the United States, where the Russians bought 14.8 million tons during the last year, is not expected to be dramatic. The Soviet Union is committed to buy at least 6 million tons of U.S. wheat and corn every year, but analysts expect that they may not buy much more than that

The U.S. Agriculture Department has been forecasting a good

Soviet grain crop this fall, but in September the upper limit on its es-timate was about 224 million tons.

Most of the push for grain here is not to produce bread but to feed cattle and increase the supply of meat available to Soviet consumers. The Soviet government is committed to raise per capita meat con-sumption from 121 pounds to 165 pounds by 1980, but to do that it will have to make each harvest close to this year's record total. The plan is for a 235-million-ton grain harvest in 1980.

### Urges Stable U.S. Links

Mr. Kosygin's speech was re-markably subdued, with few barsh words for anybody except the Communist Chinese, whom the So-viet leader accused of an aggressive

policy of "hegemonism" aimed at Moscow's allies in Vietnam.

The independence of most Demincluding ocratic congressional incumbents from White House cootrol makes it impossible to consider the voting as a referendum oo President Carter's a reference of resident And the backlash against Republican efforts to focus the voting solely on the least Republican proposals for sweeping and the Lax cuts denies the opposition party ald have its hoped-for headstart on the 1980 campaign.

### **Negative Element**

in talk mi One negative element hangs over liklthood that the majority of eligih from the 36.6 percent of the last " " mid-term election of 1974 to less want, than 33 percent — a low not seen har no since the wartime electon of 1942.

Since absenteeism is usually reaviest among low-income and minority voters who tend to be (11) Themocrats, a number of close races could then swing to the Republi-

Republican strategists note that heir candidates lost 28 House seats n 1976 by 2 percent or less — a blan efficit that easily could be wiped but if the electorate is significantly maller than the 54 percent of eligi-- le persons who voted in 1976. Nevertheless, Republicans are

nlikely to make the gains they ped for when they launched their turemely expensive and well-: 4 affed campaign.

This is particularly true in the ... - thernatorial and state legislative 1ttles that measure grass-roots arty strength. The Republicans e now favored to make a net adinate tion of only four or five states to

trol. Republicans have improved their chances for takeovers in Pennsylvania, Massachusetts and Wisconsin and have strengthened their prospects for holding on in Illinois, Michigan and Ohio. But the Democrats seem almost certain to govern California, New York, Texas and Florida, all of which at one point seemed possible for Republicans to

### Standoff Possible

In the Senate, where Democrats have a 62-to-38 advantage, a stand-off is possible. Democrats are favored to take over vacated Republican-held seats in New Jersey, Ne-braska and Oklaboma, but Republicans are favored in Demo-cratic vacancies in Mississippi, South Dakota and in the Minnesota battle between Republican David Durenberger and Democrat Robert Short.

Each party bas six seats which are in serious jeopardy. The Republican trouble-spots are Sens. Edward Brooke, Massachusetts; John Tower, Texas; Charles Percy, Illi-nois, and Robert Griffin, Michigan. as well as the vacant seats in Kansas and Virginia

Democrats must worry about Sens. William Hathaway, Maine; Jeunings Randolph, West Virginia; Wendell Anderson, Minnesota, and Floyd Haskell, Colorado, as well as vacant seats in Alabama and Mon-

Only in House races have Republicans raised their sights slightly. There are about 40 Democraticheld seats where Republicans have a realistic possibility of winning. There are also, however, two dozen Republican seats equally in trou-

give the Republicans a net gain of 10 House seats, hardly enough to change the power balance in the current House of 286 Democrats and 146 Republicans, with three

The GOP gaio could easily increase if the turnout falls to the levels now predicted. An offsetting factor is that Democratic state tiekets appear strong in several of the states where Republicans have possibilities of multiple-seat pickups — New Jersey, New York, Florida Texas and California.

In California, Democratic Gov. Edmund Brown appears beaded for a landslide, and the latest New York polls show Democratic Gov Hugh Carey winning.

Other states where Democrats are favored to retain the governor-ship include Alabama, Arizona, Arkansas, Colorado, Connecticut, Florida, Georgia, Hawaii, Idaho, Maryland, Minnesota, Oklahoma, Rhode Island, Texas and Wyo-

Republicans are favored to stay in power in Alaska, Illinois, lowa, Kansas, Michigan, New Hampshire

Democrats are favored to take over in South Carolina and replace the retiring Independent governor of Maine. Switches from Demo-crats to Republicans are likely in Nebraska, Nevada and Oregon.

Democratic gubernatorial control is in jeopardy in Massachu-setts, New Mexico, Pennsylvania, South Dakota, Tennessee and Wisconsin, while Ohio Gov. James Rhodes, a Republican, is in a close fight for reelection.

### Towel Stealing Is Least Worry Of Crime-Menaced U.S. Hotels

ALEXANDRIA, Va., Nov. 5 - The hotel manager puts in a very busy and vexing morning. Thieves make off with a \$2,000 statue from the lobby and a guest reports a stolen imported car. Then, late in the day, while the manager is still in a state of shock, the thieves come back and steal a piano.

This is not the plot for a new TV series about the pitfalls of running a hotel. It is a true story, illustrating an area of crime that has received little attention and which threatens the very existence of small hotel and motel operations in the United States, according to Merritt Kanner, senior vice president of Rocky Pomerance Associates, a Miami-based security consulting agency.

Speaking to the National Crime Prevention Association during a three-day conference that closed Friday, Mr. Kanner said most people think of crime in hotels and motels as no more than guests making off with souvenir towels, glasses and asbtrays. One guest in three will take something, he said, feeling that "taking is not steal-

But that is the least of the problem. Some guests carry out furniture, tear off wallpaper and rip off pictures that are bolted to the walls. And besides the guests, there are the criminals who descend on motels and hotels bent on stealing or otherwise defrauding the

Overall, Mr. Kanner said, the industry loses \$1 billion a year from theft, with another \$30 million in losses from unpaid bills and bills paid with stolen credit cards and traveler's checks. Mr. Kanner said that of all hotel-room thefts, 50 percent occur in

unattended rooms, and in 95 percent of these cases, there is no sign of forced entry. He said one cause may be the 40,000 to 50,000 unreturned hotel keys that are in circulation at any one time.

### Carter Campaign Message Carries Republican Ring

By Terence Smith

SACRAMENTO, Calif., Nov. 5 in this regard are waste and inefficampaigning for Democratic candi-dates with a message and rhetoric that carried a decidedly Republican burgh, a Republican, and Massa-chusetts's gubernatorial opponents, Democrat Edward King and Re-publican Francis Hatch Jr. Other candidates have seen their

The virtues of tight money, reduced government spending, a streamlined federal bureaucracy and a strong national defense were bis themes as he stumped for Democrats in Illinois, Oregon, California and Minnesota. It was his last major campaign swing before Tues-

day's voting.
Sounding like former President Gerald Ford, the man he defeated two years ago and who was himself campaigning for Republicans here last week, Mr. Carter portrayed his administration as a marriage of competence and compassion.
"We are cutting the deficit, we

are giving better services, we are also cutting taxes," he tald an enthusiastic audience in Skokie, Ill., Thursday night, "That's a good combination.

At rallies Thursday and Friday, Mr. Carter has been defining not only the themes of this year's campaign but also those of his administration. He seems to be setting the tone, in fact, for his own re-election drive in 1980. One aide jokingly dubbed the theme "fiscal conservatism with a heart."

### Carter Message

His message essentially is: The traditional liberal Democratic de-sire for social welfare programs for the poor and disadvantaged must be combined with a greater concern over the cost and effectiveness of an election that most will say is

(NYT) — President Carter ciency in government. crisscrossed the nation last week campaigning for Democratic candiment. "I believe in tough management," he said repeatedly, citiog his

reform of the Civil Service system and his reduction in the overall federal deficit. The message seems to ring a bell especially with blue-collar audiences. In enunciating these themes, Mr.

Carter is stealing the Republicans' thunder and responding to the cooservative mood that seems to be prevalent among voters.

He has decided that Democrats

— especially Carter Democrats — can capitalize on this spirit of con-servatism as well as the Republi-

In a sense, it is an old Democratie theme, espoused by Grover Cleveland and the populists of the early 1900s, that was obscured by the social activism of the New Deal and the Great Society. Mr. Carter is recasting it to fit the 1970s, but the common elements remain. Cleveland used to promise "a dollar's worth of government for every dollar spent," and Mr. Carter is saying much the same thing.

### Further to Right

The result of the president's cam-paign has been to drive the Republican candidates and spokesmen, such as Mr. Ford, further to the right. In his recent appearances, Mr. Ford has accused Mr. Carter not of going in the wrong direction with his programs, but of not going far enough. It is an ideologically coherent posture, but not one likely to generate much enthusiasm.

It tends, in fact, to blur Mr. Ford's image and sharpen that of Konaid Keagan. The former Cali fornia governor has been campaigning vigorously in recent weeks, proclaiming 1978 a great year for conservatives." In part, he has Mr. Carter to thank. By co-opting many of the moderate Republicao positions for the Democratic Party, Mr. Carter is pushing the Republican center farther to the That is fine with the president's

political advisers, such as Hamilton Jordan, his top political aide. He and other key figures in the admin-istration believe that Mr. Carter would have far less trouble defeatiog a clearly labeled conservative opponent in 1980 than a more moderate figure, such as Sen. Howard Baker Jr. of Tennessee.

In his campaigning last week, Mr. Carter also addressed the one subject that his advisers believe poses the greatest potential trouble to him to 1980 — inflation.

Speaking to an audience Friday Portland, Ore., the president contended that had he oot acted decisively on Wednesday to stem the decline of the dollar overseas, it would have necessarily produced a

He said that his decision to tight en the money supply would "stabil-ize the dollar, expand American exports, create more jobs for American citizens and make sure that we do not have a recession in 1979."

To support his argument, Mr. Carter quoted statistics that he has just received from Washington indicating that the October unem-ployment rate had dropped to 5.8 percent, down from 6.0 percent in September.

### **Full Test Ban Called Risk** To U.S. Arms Reliability

ty this year, the Energy Department has warned Congress that a comprehensive ban could endanger

weapon reliability.

In testimony released Friday, the agency presented Congress with a list of instances in which it said that weapons in the U.S. nuclear stockpile would have failed to functionally the said that the said that weapons in the U.S. nuclear stockpile would have failed to function. tion properly if they bad lain untested for a number of years.

The Energy Department, which usually describes the stockpiled weapons as 98 percent reliable, out-lined the series of problems to show that a comprehensive ouclear test-ban could have a negative effect on

reapon reliability.

According to Donald Kerr, deputy assistant energy secretary, tests of ouclear devices in the past were necessary to show design defects and the unpredictability of weap-ons deployed to U.S. military

In ooe instance a "serious problem" was found that would have af-fected more than half of the weap-ons then in the U.S. stockpile. Mr. Kerr said Friday that security clas-sification prohibited him from describing exactly what was involved.

It was learned from sources, however, that a type of explosive system used to cause the ouclear reaction in several weapon systems had failed to operate as expected several years after the weapons had been put in stockpile.

### One-Tenth Yield

If the failure had not been discovered, sources said, the yields of the weapons would have been about one-tenth of what was

In another instance, Mr. Kerr described a weapoo that was modified during the 1958 to 1961 moratorium on testing. Because of the moratorium, the weapon - reportedly a 200-kiloton bomb — went into the stockpile without a test.

After the Soviet Union broke the moratorium in 1961, the modified bomb was tested and, according to Mr. Kerr, its yield was reduced "al-most a bundredfold." Other sources said that it exploded at about three kilotons.

Mr. Kerr gave his examples in a Sept. 29 letter to the House Armed rvices Subcommittee on intelligence and Military Application of Nuclear Energy.
The subcommittee has been

sharply critical of Carter administration efforts to conclude a testban treaty with the Soviet Union.

During the subcommittee's Aug. 14 hearings, Mr. Kerr said that testing was needed to make certain that weapons in the stockpile remained reliable.

That remark drew a letter of criticism from three respected scientists, two of whom had held key positions with Los Alamos Scientific Laboratory, the oldest of the nation's two nuclear-weapons laboratories.

### No-Test Assertion

Norris Bradbury, the former Los Alamos director, and Carson Mark, the lab's former theoretical division leader, said that there was no testing now of stockpiled weapons for iability and none was occded in the future.

to that assertion.

Mr. Kerr's letter was in response Before the instances mentioned

by Mr. Kerr in his letter, problems within the U.S. nuclear stockpile have been kept secret. Friday, however, officials close

to the nuclear-weapons program foods.

By Walter Pincus

WASHINGTON, Nov. 5 (WP) — cited two other instances where Despite President Carter's efforts to conclude a ouclear test-ban trea-ability of stockpiled weapons to operate as planned.

In the 1960s, a source said, a par-icular safety device was put into ouclear warheads to prevent them from exploding accidentally. Several years after it went on deployed weapons, the device was tested. It was found it had deteriorated and was preventing the nucle-ar warhead from going off when it was supposed to.

### Affected by Radiation

In another case during the late 1960s, tests associated with anti-ballistic missile systems found that a deployed U.S. missile warhead would out work after being ex-posed to certain types of radiation. Changes in the nose cone of the missile had to be made to remedy the situation.

In a report released Friday, the House Armed Services Committee recommended, "No test ban be agreed to by the United States until a strategic-arms limitation agree-ment (SALT) has been ratified with the advice and consent of the Senate."

It also argued that any future test-ban agreement should "provide for weapons tests of sufficient yield to assure the reliability of U.S. strategic and tactical nuclear

weapons."
The Carter administration has been pushing a three-year test ban with only laboratory-size ouclear experiments to be allowed. The subcommittee recommended tests of up to 10 kilotons (a yield equal to 10,000 tons of TNT) be permit-

In a dissenting view, Rep. Robert Carr, D-Mich., argued that "a mu-tual loss of reliability" in the nucle-ar stockpiles of the United States and Soviet Union might be a good thing in that it would make a nation worry about whether its weapons would work well enough to justify using them against the othe

### U.S. Scientist Reports Limited Cancer Control

CHICAGO. Nov. 5 (AP) - A Nobel Prize-winning scientist says new findings show prospects for protecting humans against environ-mentally caused cancers.

The scientist, Dr. Charles Hug-gins of the University of Chicago. limited his research to hydrocarbon-induced leukemia in rats and says he achieved 100 percent results in preventing this form of cancer with the use of Sudan III, a dye used in red lipstick.

He said the results have wider implications.

Dr. Huggins, who won the Nobel Prize in medicine in 1966 for development of a hormonal treatment of prostatic cancer, discussed his findings last week at a University of Chicago meeting.

"The preservation of life and the

prevention of leukemia by azo dyes for which Sudan III is onel are spectacular effects." Dr. Huggins said in a report published in the September Proceedings of the National Academy of Sciences. He said the substance used to induce leukemia in the laboratory rats was a hydrocarhon, TMBA, akin to many hydrocarbons known to cause cancer in animals and commonly found in auto exhaust, soot. smog, cigarette smoke and smoked

### A Layman's Guide to U.S. Moves on Currency Crisis nies credit to smaller businesses en far more sharply than is justified have been complaining about? More immediately, however, the in-crease puts a dent in homebuilding by prompting investors to take their money out of savings and loan institutions — which provide the bulk of the financing for the housing industry — and to transfer it to other investments. Since so many other sectors of the economy depend on the housing industry, the

mpact can be severe. Why had the dollar been declining? A: There are long-term reasons and more immediate ones. For

many years, the dollar was clearly the kingpin of currencies - mainly because the U.S. economy was far stronger than others. But that was based oo conditions just after World War II. In the 1950s and 1960s, other nations — notably West Germany and Japan — re-built and caught up with the United States. But the currency values were not allowed to reflect the change, straining the world mone-tary system. The United States devalued the dollar in 1971, and it has

### been falling ever since. Recent Slides

The most recent series of slides began in late 1977, when the markets began getting jittery about the failure of the United States to take ecocomic actions they thought were necessary. Inflation was speeding up, but the United States had oo anti-inflation program. Oil imports were a problem, but the United States had no energy program. And the American trade balance was deteriorating sharply. By cootrast, these problems were less serious abroad. So the dollar began

declining sharply.

Q: Why is it so bad for the dollar to decline? I thought under the new system of floating exchange rates, it was supposed to be okay for a cur-

rency to slip a bit.

A: That's right within limits. Technically, there is nothing wrong with the dollar declining, provided it is part of an adjustment to take account of changes in the U.S. economy. Normally, the dip ought to relieve pressures on the dollar. And the cheaper dollar should help reduce our trade deficit by making imports less attractive and U.S. exports more competitive. The prob-lem is that the decline also adds to to the brink.

How does raising interest
How does raising interest
U.S. inflation. And if the dollar slides too far, it could cause a reces-

Q: But U.S. officials have been

A: On this point, a lot of economists would agree with the administration. But there is another aspect to the markets that is sometimes overlooked - their daily ups and downs are not always linked to what is really going on in the world. Sometimes the market moves simply because the currency-traders think they can make more money pushing it a particular way. For all the talk about the legendary "gnomes of Zurich," these traders are not analytical geniuses. Mass psychology often rules. The trick is stay ahead — the dollar be

Q: Are these the speculators the administratioo keeps talkiog

about? A: Yes. But the speculation comes in two forms. First, there are the speculative attacks, where traders drive the dollar down, or np, for their advantage. That is dangerous and hurts the world economy. But there is also some speculation by corporations and individuals with business interests abroad who need to use foreign currencies in their transactions. They play the market simply to avoid suffering losses when currencies change in value. But their actions aggravate the

problem Q: If these speculators are so bad, why doesn't anyone crack down on them?

A: There is very little anyone can do. If the industrial nations imposed restrictions on the currency markets, it would crimp worldwide economic transactions. We could return to fixed exchange rates from the floating rate concept adopted in the early 1970s — but the pressures on oations to devalue or upvalue their currencies might wreak more havoc than the present system. It is just like trying to bell the stock market. The result might well prove worse than the present

O: But has not the United States taken some steps to correct the

ministration may have succeeded, at least for the moment.

Q: Exactly what did the president do on Wednesday, and what was be trying to accomplish?

A: The package was complex, but basically it had two parts. First, . Carter served ootice that the United States no longer would tolerate the runaway speculation against the dollar and would intervene massively in the foreign exchange markets by buying up bil-lions of dollars if necessary to stop speculation. The pledge was backed

up by an unprecedentedly large money pool of about \$30 billion. And West Germany, Switzerland and Japan joined in the effort. Second, Mr. Carter acceded to a sharp rise in U.S. interest rates, designed to make it more attractive for investors to bold dollars rather than foreign currencies. And, he ordered the Treasury to begin issuing foreign-denominated U.S. securi-ties, which are expected to lure holders of foreign currencies into trading in their dollars. The diffi-culty is that higher interest rates

Q: Did it work?

dollar rebounded sharply oo the price of gold - to which speculators always flock when the dollar is in trouble — plummeted. On Wall Street, the stock market leaped 30 points; its steepest single gain since the wage-price controls of 1971. Most encouragingly, long-term interest rates — considered a key beliwether of the market's assessment of U.S. inflation prospects fell for the first time in months.

Q: If this dollar problem were so critical, why didn't the administra-tion act before? Haso't the dollar been declining sharply for some

tional, saying it would only be temporary and most likely would be re-versed when the trade and energy situation improved Second, the strategists recognized that any major rescue effort would mean rais-ing U.S. interest rates and that could increase the risk of recession. Some of Mr. Carter's key advisers believe interest rates had risen dan-

gerously high already.

Q: Who is to blame for this currency crisis — Mr. Carter or the

markets? A: Both. The president had dozens of chances to take actions to slow inflation during his first 20 months in office but did nothing while price pressures mounted. He also shunned any really forceful moves to counter the dollar's decline. As a result, inflation prospects worsened, setting off the dollar's slide. And the markets took it from there, overreacting to the situation and inviting last week's harsh action.

### The Defense of the Dollar

Having made the right decisions last week in defense of the dollar, President Carter now needs to stick firmly with them. Last summer, the administration repeatedly obscured its own position behind murmurs from the White House that interest rates were already too high and hints from the Federal Reserve Board that they would shortly peak and begin to decline. The president has now chosen a course of action that is difficult and painful, but necessary. He cannot afford to let anyone doubt that, this time, he means it.

The last sharp slide in the value of the dollar - costly and disruptive to the world economy, ominously inflationary to the United States - owed a lot to uncertainty about Mr. Carter's intentions. It was a response not only to things that have actually happened, but also to things that traders. bankers and foreign governments thought might happen next. Specifically, they suspected that the Carter administration, moving toward the 1980 election, was prepared to go to any lengths to avoid a recession. There seemed to be a good deal of evidence scat-

tered around to support that suspicion.
When Mr. Carter announced his guidelines for wages and prices, he omitted any mention of interest rates and the very rapid recent growth of the money supply. A lot of people in the currency markets immediately assumed that the country was in for a repetition of the disingenuous strategy that the Nixon administration used in 1971-72. In that well-remembered example, the government imposed mandatory controls on wages and prices, then proceeded to invoke the most inflationary tactics possible to speed up the economy for the election year. The consequences fell on the economy after the election, of course, but they were severe and they still contribute heavily to the country's present troubles. Because of that unwholesome precedent, it was essential for Mr. Carter to make it clear, at once, that he did not propose to let the money supply keep spinning

His actions will raise interest rates further, and perhaps cut off credit to some borrowers who need it. It is a somber prospect. But the alternative would have been to let inflation float to still higher levels. As the country learned in 1974-75, unrestrained inflation can produce an unusually deep and frighten-ing recession. It has frequently been said that Mr. Carter's decisions last week have made a recession more likely. That is not quite right. A recession within the next year or two was becoming increasingly probable in any case. His actions have made it likely that a recession will come sooner — but, we would argue, be less severe when it comes, passing more quickly, inflicting less harm.

THE WASHINGTON POST.

# **Moral Turpitude**

So the Immigration and Naturalization Service wishes to deport Nguyen Ngoc Loan, the former South Vietnamese official who executed a Viet Cong suspect in full public view in 1968 and has recently been running a small restaurant in suburban Virginia. "Moral turpitude," claims the INS, urged on by Rep. Elizabeth Holtzman, D-N.Y., and Harold Sawyer, R-Mich. They agree that Mr. Loan is a war criminal deserving of trial in Harol, and it disturbs them that he and his Hanoi, and it disturbs them that he and his ilk should enjoy the haven offered here to supposedly worthier Vietnamese refugees.

We are disturbed, too, but not that a chance for a new life should be offered to people who in their old lives did some very ugly things. We are disturbed that some Americans still cannot bring themselves to accept and live with responsibility for the United States' own part in the Vietnam War. The uncomfortable but critical fact is that Mr. Loan fought on the American side. He and some other refugees took risks and made commitments and, yes, performed the acts for which they now are challenged in the mutual awareness that the United States was their partner in the war and that they could expect a certain commitment in return. Now

some Americans pretend that the United States did not dirty its own hands in Vietnam and had no responsibility for what our allies did there. They would compel Mr. Loan alone to pay. Or is it that they think our own participation in a war about which they still feel guilty can be expiated by offering up Mr. Loan as a suitable public sacrifice?

Mr. Loan is not like those Nazis who fought against the United States and then, by one guise or deal or another, sneaked in. He fought with the Americans — in the instance of the execution, in full public view. Far from sneaking in, he was offered sanctuary by a government fully aware of who he was and what he had done. It is incredible that some bureaucrats and legislators would now wish to erase the commitment the country made to Mr. Loan, and to compel him to face a "war criminal" trial in Hanoi. Back in 1975, a lot of Americans were deeply troubled that the United States had abandoned many Vietnamese to whom it had a debt. How grotesque that others feel the United States did not abandon enough. A more pathetic confusion of values and laying off of blame is hard to recall. Moral turpitude, indeed.

THE WASHINGTON POST.

### International Opinion

### Scandal in S. Africa It is much harder to publish a free press or

preserve a judge's detachment in South Africa than it is in Britain, and those who succeed do their country great credit.

Again and again the newspapers and the courts have served the South African government much better than it deserves.

The emerging scandal about the use of public funds for covert influence on public opinion is the latest and one of the best examples. And it is the Afrikaans press as well as the English which has refused to accept government denials, ignored threats of prosecution under the Official Secrets Act, and paved the way for the revelations of Judge Anton Mostert. His part in the affair is laudable. Under strong personal pressure from Prime Minister P.W. Botha not to disclose evidence of official corruption he has done so . . . A parliament, an auditor-general, an inquiring press, an independent judge: these are worth more to South Africa than any number of government-inspired column-

- From the Guardian (London).

The fact that South Africa's Parliament has been recalled for an emergency session (an extremely rare event in the country's history) is a measure of the gravity of the crisis the disclosure of corruption and misuse of public money has brought about.

The judge who had inquired into the scandal went ahead and published the damaging evidence before him despite pressure from the new prime minister, Mr. Pieter Botha, to keep quiet. He displayed commendable moral courage. He also demonstrated to the world that, whatever its blemishes, the rule of law is not extinct in his country. Now [it is promised] that no facts uncovered in the forthcoming investigation will be hushed up.

It will be a bad day for South Africa if this pledge is not honored.

The scale of corruption now alleged

- From the Sunday Telegraph (London).

against leading past and present members of South Africa's dictatorial government threatens to make Watergate look like a parking offense.

Thanks to the courage of Judge Anton Mostert, evidence has been made public that millions of pounds worth of taxpayers' money was used in an unsuccessful bid to buy up a newspaper group not sufficiently friendly to the apartheid regime of ex-Premier John

When that failed the money was used to finance a rival paper controlled by the government's friends. The secret police were involved in the cover-up bid. And even when the judge lifted the lid, efforts were made to suppress the story by threatening newspapers with prosecution.

It is a dirty, shocking, contemptible tale. If there is any decency left in South African politics, there should be resignations at the highest level.

- From the Sun (London).

### Unesco and the Media

It is not desirable that there should be any declaration on the media. jointly sponsored hy governments that have absolute powers over the media and by governments that do not have, and do not seek, any such powers. To seek to water down the draft declaration is a tempting option, and one at least partly condoned by the International Press Institute, but in the end "confrontation" - refusal to subscribe to any other such declaration at all — will be preferable to the insidious ambiguities of a compromise between utterly irreconcilable positions.

- From the Observer (London).

BERLIN — The launching of a widespread scheme for the relief of the serious housing shortage in the Ruhr - Germany's most overcrowded industrial area - is now officially announced. By the use of mass-production methods, the Ruhr Housing Authority expects to be able to complete its building program at an average cost of 10,000 marks (\$2,500) per house. The Ruhr Housing Authority, the first large industrial body to tackle seriously the problem of congestion on such a large scale, includes as shareholders the firm of Krupp and other con-

### Election '78: Synthetic Politics

By David S. Broder

WASHINGTON — It was not until a Saturday night in late tween the posturings of the campaigns and the realists of the decisions that change people's lives. In 1978 was missing — the drama, the fun, and the passion of real politics.

There is no credible linkage between the posturings of the campaigns and the realists of the decisions that change people's lives. In the fund week of this campaign, the fund week of this campaign, the fund week of this campaign, the fund week of this campaign. For reporters of a certain age, Waterbury has one indelible association. On the last Saturday night of the 1960 presidential campaign—to really Sunday morning, for it was past 2 a.m. when he finally got take in that struggle was being there—John F. Kennedy found the Waterbury square filled with thousands of cheering Democrats who had been waiting for five hours in the chill to see and hall their favorite. They were so fired discussions. For reporters of a certain age, confidence in the American ecotheir favorite. They were so fired up with enthusiasm that even after be had spoken, they did not want to let him go — or break the spell by leaving.

And in '78

Well, Waterbury was not quite that on this Saturday night in 1978. But when Democratic Gov. Ella Grasso drove into the same square for a labor rally, there was a brass band out to meet her, and the sidewalk was jammed with union cession into the eburch basement, where the rally was held.

in the back, the air was filled with the old-fashioned Democrane oratory of Gov. Grasso and former Democratic Gov. John Dempsey. They remember that night in 1960 very well. Their words brought cheers from the working families who still believe in the dreams that Franklin Roosevelt and John Ken-

nedy espoused. But this was a rare moment in a campaign year that even the candi-dates found desultory and dispirit-ing. Most of those running felt that they were preaching to stones, and the dearth of eloquence made it a signal event when an occasional orator - like a Ted Kennedy or an Ed Brooke — could lift a crowd by the power of his words.

### Whipsawed

Most candidates this year found themselves cruelly whipsawed by the need to satisfy conflicting imperatives. One was to convince their constituents they were "real people," not just another of the despised breed called politicians. And the second was to raise enough money to saturate the airwaves with their ads during the final two weeks before election.

For the congressional incum-bents, the first imperative meant bundreds of hours in mobile vans. district offices and town meetings, listening to the voters and helping them with individual problems. For the challengers, it meant "working" for a day or two at a time beside their constituents in filling stations, factories or supermarkets, walking the roads of their state or district, or otherwise putting themselves in touch with the daily lives of the

For everyone, fund raising was a time-consuming burden and a distasteful negotiation with hard-eyed guys who were nailing down your position on their issue and who were less concerned with your leadershp potential than your standing a U.S. citizen and has extra income

in the polls. The technological advances of modern campaign communications Security trust fund (in other words — television ads, computerized on which FICA taxes are paid). modern campaign communications mail, telephone banks and the rest - have not only driven up the cost of elections, they have depersonalized the election process.

Ironically, for all their efficiency.

these techniques are failing the ultimate test of engaging the voters' he can earn \$4,000 in 1978 without interest. The public is turning away any loss of benefits. A typical exfrom this kind of synthetic politics. ample of such a case is someone Made-up candidates with made-up employed by a U.S. company or its TV spots and mass-produced "personal" letters are contributing to the cynicism of a public increasingly "turned off" from politics.

was represented by the Camp Da-vid summit was treated by the president who accomplished it as un-suitable, material for campaign

So the pride and energy that might have been infused into politics by discussing that accomplishment was withheld — even as the economic debate was being conducted in secret in the final days of

A politics that is as devoid of content as it is empty of tradition, nitual and eloquece is anything but a healthy politics. And that, unfortunately, is what we saw most days and nights in the campaign of 1978, So one is grateful for small fa-vors—like Waterbury.

# Expelling a 'Snake' From Tanzania

By Tom Wicker

gion may not turn out to be much of a war. At least for the moment, of a war. At least for the moment, however, it is a distraction from southern African problems for Julius Nyerere, one of the most important leaders of the "front-line" states. And it is just possible that it could bring on the long-awaited downfall of ldi Amin Dada. Uganda's unpredictable and unaccountable strong man.

As it is seen here by Western and Tanzanian sources. Amin moved into the Kagera distict of the West Lake region primarily to relieve domestic pressures against him, in-cluding active mutiny in his army. Nevertheless and despite Amin's claim that the 700 square miles he has taken over ought to be Uganda's anyway, President Nyerere is determined to expel what he calls "this vile snake . . from our house." But that could take some doing. Tanzania's West Lake is a panhandle region between the west shore of Lake Victoria and the Rwanda border, reached only by two dirt roads, with the nearest railhead far away at Mwanza, on the lake's south shore.

The West Lake is "Tanzania's Siberia," they say here, and the logistics of driving Amin's troops back into Uganda are formidable. On the other hand, Amin's absolute dependence on transportation through Kenya for the oil and gas his army needs makes it unlikely that he will try to expand his invasion much beyond the Kagera dis-sion much beyond the Kagera dis-trict already taken. He might take the sizable town of Bukoba, which his planes already have bombed, and if Ugandan forces have blown up the single bridge across the Ka-gera River, as was claimed in Kam-pala Radio reports late last week, the problem of ousting Amin from the area be is holding north of that the area be is holding north of that stream would be far more difficult.

The Kagera makes a loop below the parallel of 1 degree south, which has formed the official bor-der between Uganda and Tanzania since colonial days. Amin elaims the river is the natural border between the two countries and it is the land below the parallel and within the river loop that his surprise assault captured without

Already a number of trucks and buses have been commandeered by the Tanzanian government in its burried military mobilization. The rail line north to Mwanza will be taken over for military purposes, and thousands of Tanzanians who bave had military training are being called up for refresher courses. All this could get much worse in a pro-

benefits are lost for this month. Mrs. Zlotowitz urges Americans

most as dependent on this fuel as Japan. Accordingly, you seldom hear the Japanese or the Europeans siding with the Israelis against the oil producers of the Middle East.

U.S. Arms Sales

Even the United States, which is increasingly dependent on Middle East oil, did not hesitate to sell modern aircraft to Saudi Arabia against the wishes of Israel, and despite all the talk here about limiting the world arms traffic, Washington has been trading the most sophisticated military weapons to Iran for oil and is now doing all it can to belp the shah in his political trou-

The Soviet Union did not create the political tangles in Iran, but as usual, it will exploit the shah's difficulties to its own advantage whenever it can. Even the Russian czars leaned on Persia in their yearning for warm-water ports and access to the southern seas, and Moscow has watched the modernization of Iran and particularly its growing acqui-sition of modern American arms with considerable concern.

. Also, in this endless competition between Washington and Moscow events have not been going Moscow's way in recent years. They have apparently increased their influence as a result of the latest transfer of power in Afghanistan, and they have been working with Syria. Iraq, Libya, and the other states that oppose a reconcili-

alion between Egypt and Israel.

But on the major political problems abroad, President Brezhnev has even more anxieties than President Carter. Brezhnev has not been able to compose his differences with the new regime in China, If anything; the emergence of the new leaders of Peking into the world of modern technology has increased the competition and conflict between these two major Communist

ficials of the Silahtaraga reon sub-station said that scores ictories lining the 8-kilometer ien Horn were affected by the

Capt. Davis had entered the advertisements as evidence during his general court-martial at Fort McNair here, The Army breached e all-volunteer era dismissed McNair here. The Army breached pm the service and fined \$2,000 its contract with him by not fulfillter convicting him of disobeying ing promises of modern medical equipment, equal pay for equal work, 30 days leave a year, promotion to major in three years and time off to attend medical meetings, Capt. Davis contended.

"They are not cootracts," Judge Hanft said of the recruiting ads Capt. Davis had cited. "These are merely advertisements.

He said the government lived up to its written contract with Capi. Davis, which obligated it to pay for his medical schooling in exchange for two years' service as an Army

But Col. Hanft took much of the sting out of the Army charges by dropping a desertion charge altogether, softening an insubordina-tion charge from "willfully" disobeying an order to "failing" to obey it, and amending a charge of missing "through design" his flight to Korea to missing it "through

Capt. Davis was convicted of all the amended charges as well as two counts of going absent without

After Col. Hanft had declared the 30-year-old defendant guilty but before he had passed sentence. Capt. Howard Lent, Capt. Davis' military counsel, recommended that his client be dismissed from the Army. He argued that asking Capt. Davis to resume practicing, when he still felt that his contract had been breached, would just bring the whole controversy back into the courtroom.

### Morale Issue Seen

Sending Capt. Davis to prison, testified radiologist Kathleen Dunne Eggli, who worked with the accused at Walter Reed, would only further lower the morale of the Army Medical Corps, prompting more physicians to resign at the first opportunity.

Capt. Davis, taking the stand

t before being sentenced, said he had offered to repay the govern-ment for its educational expenses and to serve in Korea as a civilian doctor, and had refused to continue practicing in the Army because "I certainly had to follow my con-science. My honest opinion is that there were serious violations" of

the contract for medical services.

Capt. James Lee Jr., for the prosecution, said that Capt. Davis was trying to get out of the Army "to pursue the almighty dollar" after receiving his medical training at

government expense.

By equating military service with fulfilling a commercial contract, Capt. Lee continued, Capt. Davis has "reduced every single individual in the service to a mercenary. That is a humiliation to the rest of us, an outrageous affront to every-thing the armed forces stand for."

WHAT COMES DOWN MUST GO UP - Snow covers Zugspitze, the highest mountain in the Bavarian Alps, and skiers take advantage of a sunny weekend to flock to the slopes near Garmisch, West Germany. But before they can race downhill they have to line up and wait at lift stations.

### N.Y. Newspaper Workers Back After 88-Day Strike

96-page paper with nine pages of "catch-up" information for news-starved New Yorkers.

"There is going to be a paper tomorrow," Mr. Pomfret said.

NEW YORK, Nov. 5 (UPI) — The Newspaper Guild took down its picket line at The New York Times today and other unioo workers were ordered to report to work to put out the first editions of the Times and the Daily News in 88

days.

The agreement by the guild to take down the line, despite the fact it had oot worked out a tentative pact with The Times, signaled the return of the two morning papers.

"In order to publish Monday, employees of the News and Times are asked to report at their oormal

are asked to report at their oormal starting times," said George MeDooald, head of the Allied Printing Trades Council, an umbrella group of newspaper craft

STOCKHOLM, Nov. 5 (AP) A strong earthquake, measuring 6.7 on the Richter scale, occurred yes-terday in the border region between northern Iraq and Iran, the Uppsa la Seismological Institute said. No details were available.

### Through Transfer of Funds

### \$10.2 Million Stolen From U.S. Bank

By Al Delugach

and Doyle McManus LOS ANGELES, Nov. 5 - A thief has stolen more than \$10.2 million from Security Pacific National Bank by tapping into the bank's system for transferring mon-cy to other banks. Security Pacific

has charged.

The FBI said it is seeking Stanley Mark Rifkin, 32, a computer consultant, in connection with the case. It is apparently one of the largest bank theirs in U.S. history.

About \$2 million of the missing funds have been located, Security Pacific said, but added that at least \$8 million is still missing. The mon-

\$8 million is still missing. The mon-ey had been fraudulently transferred by wire to an account in a New York bank.

New York bank.

The manager of an apartment complex in the San Fernando Valley said that Mr. Rifkin moved out two or three weeks ago and left no forwarding address, although he told neighbors he was moving to La

Jolla, near San Diego.
Security Pacific Vice Chairman
George Moody refused to reveal
details of how the money was transferred, but he said there was no indication that any bank employees dication that any bank employees were involved in the scheme.

### 8 Days Later

He said that, although the \$10.2 million transfer was made Oct. 25, the hank did not realize the funds were missing until Thursday morning—eight days later.

Bank officials notified the FB1,

which then issued a warrant for Mr. Rifkin's arrest. Mr. Moody said Friday that the

fraud against the bank's wire transfer system did not involve the use Mr. Rifkin's neighbors said he \$485-per-month townhouse, where he conducted an apparently suc-

he conducted an apparently suc-cessful computer consulting prac-tice for small businesses in the San Fernando Valley.

"He sure knew his husiness," said Jack Koszdin, an autorney who lived next donr. "I wish I had his method . . I wish I had gotten closer to him. Seriously, he was a hell of a nice guy. He was the kind of guy who left his door open so you could walk in and say hello."

Mr. Kozdin and Mrs. Jo Moran,

### Two Women Firebomb Home Of Rome Doctor

urban guerrillas struck in Rome, firebombing the apartment build-ing of an obstetrician. Investigators said yesterday that two women were seen fleeing the area shortly after hurling Molotov cocktails at the apartment of Dr. Teodolinda Mercoli Gambaccini

ROME, Nov. 5 (AP) - Female

Friday night. There were no injuries, and dam age to the apartment was light. No terrorist group immediately claimed responsibility for the

Police sources said there was no firm clue as to why the terrorists chose to firebomb that apartment, although female guerrillas have in the past attacked physicians opposed to Italy's new abortion law. The Rome apartment of a gynecologist was firebombed the same night, hut there were no wimesses to the assault, which caused minor

that Mr. Rifkin employed several college students in his computer work. "I think they're still using the unit as an office," Mrs. Moran said.

### 10th Largest

Security Pacific, the 10th largest U.S. hank, said its previous higgest theft was about several hundred thousand dollars.

Less than three months ago, S927,288 was allegedly stolen from United California Bank after the money was accidentally transferred

into an individual's bank account.

The fund, more than \$600,000 of which is still missing, later was traced to Canada and Europe. Arne Ristol, an accountant, surrendered here three weeks ago on felony

charges of grand theft.
In the Security Pacific theft, the bank said that the individual "stole information on the bank's wire transfer procedures." After having the funds transferred to an account in the hank in New York, he subsequently converted them to his own

use, Security Pacific said.

Mr. Moody said the hank betieves that a substandal portion of the loss is covered by insurance, and we are uncertain whether the uninsured portion can otherwise be recovered." He said the financial effect of the theft on the bank is expected to be immaterial. Security Pacific has assets of \$20.5 hillion. Security Pacific Treasurer Paul Smith said that the recovered \$2

### Texas Plant Blast Kills 1

# China Is Forcing Some Scientists Into Menial Jobs

By Fox Butterfield

HONG KONG (NYT)— Many of China's small number of scientists have been transferred in recent years to menial jobs or to work unrelated to their specialities, thus hampering the country's ambitious drive for economic modernization, according to an official survey.

The study, conducted for several months throughout China, found that many scientists are holding down posts as sales clerks, ordinary factory workers or administrators. In other cases, radar specialists are engaged in purchasing pigs, some persons trained in computer science are employed to distilleries and entomologists are working in iodustrial design.

In Kwangtung province, near Hong Kong, more than a third of the scientists and technicians oot employed in scientific work are reduced to being factory workers or sales assistants. In China as a whole, nearly half of all the scientists and technicians trained in agri-culture, fisheries and livestock hreeding are not doing scientific

"This has had erious effects on agricultural development," an arti-cle in the Peking paper, Kwangming Jih Pao, charged in a report on

great waste." the paper said.

Contempt for Specialists

The major reason for this situation lies in the hostility toward scientists generated during the Cultural Revolution by Man Tse-tung's suspicion of and contempt for all

### India Monsoon Leaves 86 Dead

NEW DELHI, Nov. 5 (UPI) -Landslides and monsooo rains have killed at least 86 persons in the last 48 bours in two southern Indian states, the Press Trust of India reported today.

Quoting officials, the news agency said that 64 persons died today in landslides started by downpours in the hilly tea-growing Nilgiri dis-trict in Tamil Nadu, about 400 miles southwest of the state capital

In Thanjavur district, six persons were killed when houses collapsed. And about 16 persons died in Ker-ala state, which neighbors Tamil Nadu to the east.

to another assignment some nine months earlier.

been earned - will not be unfairly tarnished.

the survey. The misuse of China's ers, writers and doctors, as well as scientific resources "is indeed a great waste." the paper said.

ers, writers and doctors, as well as scientists, frequently were accused of being rightists and were sent off for reform to factories or farms.

In other cases, scientists found themselves caught up in local factional fights and suffered accord-

A radio broadcast from Kwangtung this week, for example, reportintellectuals and specialists. Teach- ed that io 1969, 600 technicians workers and administrators in the Canton post office and telecommunicacions bureau were suddenly taken to the countryside by truck when followers of the late Marshal Lin Piao seized power in the city. Those taken away were not allowed to write letters, make phone calls or otherwise ootify their families

about what had happened. The transfer of such a large oumber of personnel, many of them technicians, caused "serious" disruption to postal and telephone op-erations in the city, the broadcast

Although Peking has ordered that such mistakes be reversed, it is evidently not easy to get people transferred back to their original work. In the Canton case, only 130 of those taken away have so far been able to get hack to their origi-nal jobs, despite official recognition of the wrong that was done.

To correct any misimpressions arising out of recent articles on our role in Olinkraft's acquisition by Johns-Manville, we are reprinting below the letter we sent to The Wall Street Journal.

The survey found that Szechwan province in the southwest had managed to reinstate 12,000 scientists and technicians who had been transferred to unrelated johs. But in many places, according to the newspaper article, party officials themselves "constitute the main ob-

stacle to this work." They do oot really understand

### Israeli Civil Servants Call Work Stoppage

TEL AVIV, Nov. 5 (UPI) - An estimated 40,000 civil servants began a 48-hour work stoppage today, paralyzing operations in government offices, the national radio reported.

The workers demanded pay increases equal to those granted recently to other government employees. Postal employees and radio and television engineers returned to work last week after an agreement between the government and the Histadrut labor federacion.

### Ireland Aide in Tokyo

TOKYO, Nov. 5 (UPI) — Irish Foreign Minister Michael O'Kennedy arrived here today for talks with Japanese leaders.

vital" to the modernization program, the paper said. Instead, they continue to "indiscriminately" stig-matize the scientists with incorrect political labels, or accuse them of being discontented with the work given them.

Equally important, the paper reported, some scientists unwilling to return to their original units," especially those in agriculture, forestry or fisheries. Part of their problem is continued fear that the political climate may switch again, and that they will once more become targets of political criti-cism. Io addition, it appears that little provision has been made for giving them satisfactory living or working conditions.

In the past few months, to encourage better scientific research. Peking has repeatedly said that the Communist Party would relax its controls over scientific institutes and let them be managed by professional scientists. Only last week the Chinese Academy of Sciences and the State Scientific and Technological Commission held a meeting in Peking to discuss this change. But it remains unclear how far local party authorities have gone in actually letting scientists run their own affairs.

October 26, 1978

Opponents of Mrs. Gandhi plastered walls with campaign posters depicting her as Hitler.

### In Southern Indian By-Election

### Voters Rule on Career of Indira Gandhi

By William Borders

NEW DELHI, Nov. 5 (NYT) — A remote area of southern India voted today in a parliamentary byelection that could be a crucial turn in the long political career of Indira Gandhi.

Mrs. Gandhi, who was voted out of Parliament in March, 1977, when she lost the prime ministership, is staging her comeback at-tempt in a hilly coffee-growing region of Karnataka state, 1,000 miles south of here.

Canvassing the voters at ber cus-tomary breathless pace, with as many as a dozen rallies a day, the former prime minister has focused her three-week campaign on what she calls the "hopeless inadequacies" of the government of Prime Minister Morarji Desai,

But for many, including her opponents, the main issue has been the harsh emergency period with which Mrs. Gandhi ended ber 11 years as prime minister, when she suspended civil liberties and locked up thousands of opposition figures.

### Vote for Anthoritorianism'

"A vote for Mrs. Gandhi," Mr. Desai said in a last-minute appeal to the voters, "is a vote for authori-tarianism and for all that stands for - the suppression of popular voice and welfare."

Mr. Desai, who speot the last 18 months of Mrs. Gandhi's term in jail as a political prisoner, sent several of his leading Cabinet ministers to the district during the past few weeks to campaign against her by reminding the voters of her

"You must defeat this lying woman and ber fascism," the industry minister said the other day. making a typical attack in the market square of ooe of the district's remote red-clay villages, deep in the gray-green mountains known as India's western Ghats.

Toward the end of the campaign, there were several outbreaks of violence. At least one person was killed in clashes between demonstrators and the police.

### **Illiterate Voters**

Today, as villagers plodded along back roads or rode lumbering bullock carts to the polling places. a heavy security force patrolled the area. The paper ballots will be collected tomorrow and counted oo-

With about a million people, most of them illiterate, rural and poverty-strickeo, the district, known as Chikmagalur, is as typical as any of India's 542 parliamentary districts.

The man it elected to Parliament last year was a supporter of Mrs. Gandhi. He voluntarily vacated his seat so that she could run in a constituency that is regarded as reason-ably "safe" for her. If she wins, she is expected to be-

come the official leader of the opposicion in Parliament, since her faction of the old Congress Party, known as Congress I (for Indira), is the second largest, after the ruling Janata Party. If she loses, it will be a severe

### French Seamen

PARIS, Nov. 5 (AP) - French merchant seamen agreed yesterday to end the 15-day strike that has tied up the nation's shipping.

To End Strike

Piles of garbage bags continued to dot the streets of Paris, however, as the city and striking sanitation workers still were unable to reach an accord. Paris train service remained disrupted as well, with many cancellations and delays due to a slowdown strike by railway workers.

The verbal agreement ending the dock strike followed police interventions at Le Havre and Marseilles, where the strikers were occupying merchant marine buildings to press their demands. The seamen decided to return to work tomorrow after the ship owners agreed to stop hiring foreign workers, a spokesman said.

### European, China Talks

TOKYO, Nov. 5 (AP) - Otto von Habsburg, president of the Pan-European Union, met in Peking with Chinese Vice Premier Chi Teng-kuci, the Chinese news agency reported today.

setback in ber attempt to regain national power,

Still, few politicians are prepared to say that even defeat now would be a fatal blow to the career of Mrs. Gandhi, who has been at the forefront of the Indian political scene almost all ber life.

The Janata Party candidate running against Mrs. Gandhi, former Karnataka Chief Minister Veerendra Paxil, has made much in his campaign of the fact that Mail Gandhi is from northern India, a auth that she cannot even speak Kant da, the language of Karnata

with most of the northern Indianal states now in the hands of the Indianal ta Party, she could not expect a f are election there. Karnataka's governant ment belongs to Mrs. Gandhi's p attack

### Henry Willson

HOLLYWOOD, Nov. 5 (AP) -Henry Willson, 67, a Hollywood agent who discovered Rock Hudson and other male stars and gave them distinctive names, has died af-ter a long illness, according to a spokesman said.

Mr. Willson died Thursday at the Motion Picture Country Hospital in Woodland Hills.

In addition to renaming Mr. Hudson — who was born Roy Fitzgerald — Mr. Willson transformed Art Gelien into Tab Hunt-Merle Johnson into Troy Donahue, Francis Timothy McGowan into Rory Calhoun and Jimmy Ercolani into James Darren. Mr. Willson said he came up with the name Rock Hudson because he was impressed hy the

actor's size.
Mr. Willson came to Hollywood in the 1930s to work for producer David Selznick and later worked for the late Charles Feldman, a studio executive, and agent-producer Freddie Fields.

Jp6 6

of these discussions we received no further data from Olinkraft. 2. Early in 1978 Johns-Manville engaged Morgan Stanley in connection with its diversification program. A number of companies were selected for review solely on the basis of publicly available information. After a computer screen produced Olinkraft as one of several possible desirable acquisition candidates, Johns-Manville selected Olinkraft for additional study and requested us to do a further analysis, which we performed using only public information. We ascertained that our original client had no further interest in Olinkraft and in fairness to . Johns-Manville advised Johns-Manville of our earlier discussions with Olinkraft. At this time we

In your article of October 26 relating to the Olinkraft acquisition by Johns-Manville, you

The facts below (which were not available to your reporter) clearly demonstrate otherwise.

indicate that certain unnamed sources question whether Morgan Stanley may have compromised its

integrity by making available to Johns-Manville certain data which Morgan Stanley received incidental

They show that, with respect to the matters referred to in the article, Morgan Stanley acted with the

highest standard of professional responsibility. We therefore ask that you publish this letter so

that Morgan Stanley's reputation for integrity - which, as your article rightfully points out, has

behalf of another client. During these discussions Olinkraft made available certain financial data,

including earnings projections as is customary in such merger discussions. After termination

1. During October 1977 we took part in an abortive merger discussion with Olinkraft on

did not disclose any of the information which we had received from Olinkraft. 3. At the end of June 1978 Johns-Manville decided against proceeding with the possible acquisition of Olinkraft. However, it decided to reexamine its position on July 17 when Texas Eastern Corporation announced an offer of \$51 a share for the shares of Olinkraft which had been

approved by the Board of Directors of Olinkraft. 4. The Board of Directors of Olinkraft - which had total and complete knowledge of

Olinkraft's projections and prospects - felt that \$51 per share was a fair price at which to sell their company. Upon inquiry from Johns-Manville, we discussed with them the possibility of an offer more beneficial to Olinkraft shareholders.

Since any higher offer to Olinkraft shareholders would require disclosure of all relevant information, we now felt it advisable to make the earlier Olinkraft projections available to Johns-Manville and did so with the understanding that this information would be included in any public filings for use by Olinkraft shareholders. Our counsel, Davis Polk & Wardwell, agreed that it would be appropriate, in these new circumstances, and with the above understanding, to disclose to Johns-Manville the information we had received from Olinkraft. The filing made on September 25th in connection with Johns-Manville's proposed tender offer at \$57 per share therefore included the October 1977 Olinkraft projections. At the same time, we also recognized that these data were then nine months old and very likely outdated. This was reflected in the filing which stated that eneither JM nor its advisor (Morgan Stanley) know whether or not these projections represent the current thinking of Olinkraft's management nor are they in a position to determine the accuracy or reliability of such projections".

5. On September 29, Olinkraft confirmed that the data included in the public filing were outdated and of no material use. It stated that "such information is not accurate and should not be relied upon". As a result, no reference to such data was included in Johns-Manville's final offering documents filed October 18, 1978.

On the basis of the foregoing facts it is clear that Morgan Stanley leaned over backwards to make sure its client and the public had available all data which could conceivably have affected their judgment; that we made Olinkraft's projections available only when Olinkraft's own actions in agreeing to sell the company for \$51 per share (with full knowledge of all current projections) made. it appropriate for us to do so; and that making such data available in no way operated to the detriment of any Morgan Stanley client, Olinkraft or the investing public.

nation to stabilize conditions.

### **Euromarket Initial Reaction is Favorable** To Dollar-Defense Package

By Carl Gewirtz

PARIS, Nov. 5 (IHT) - The dol- ue of the dollar against these key lar-defense package announced last currencies is meaningless as far as week in Washington had a dramat-foreign trade is concerned. ic effect on the foreign exchange market and a salutary impact on the dollar sector of the Eurobond

For Europeans, the package was the first substantive move to buoy the dollar and at the very least broke the panic gripping the mar-ket that the United States would remain impassive to the dollar's plight.

"I am impressed by the degree to which policies and attitudes [in

Washington] have shifted," a Swiss banker said, "from strictly domestic considerations to international responsibilities." But after singing praises to the "unprecedented" ac-"Undition — the massive 100-basis point increase in the discount rate, the in-tention to draw on the International Monetary Fund and the willingness to consider issuing foreign-cur-ic reacy denominated securities — he cautioned that "this wasn't the first

lar problem won't just go away.

"The package," he added, "will is the only way to encourage for-eigners to hold dollars. "The package, he added, but time." But unless the breathing Authority space is used to solve the "funda-lin Get mental problems — the trade and payments deficits and inflation" — he forecast a new crisis. tained a sharp improvement throughout the week. On Thursday,

foreign exchange crisis and the dol-

A minority view was expressed by a U.S. banker, who described Washington's moves as "a political

Oun into dealing with what is not the real problem and in the long-rum won't work." The real problem he won't work "The real problem he bayments surpluses by West Gernany, Japan and Switzerland despite repeated revaluations of their surrencies. He maintained the val-

3.00% . . \$ 12.00 Strangament Santa Loans

PARIS, Nov. 5 (IHT) - Few bankers expect last week's measures to

bolster the dollar to have any impact on the syndicated loan market.

Although the returns available on money-market instruments are currently more remunerative to banks than participations in syndicated loans, analysts argue that banks remain in the loan market not because they want to add assets to their books but because they want to keep their contacts with the government borrowers.

Nevertheless, a number of bankers believe that their long awaited upturn in loan margins is bound to result from the tight money policy now being pursued by the United States and the effects of its new policy of pushing U.S. banks to finance their cash needs in the Euromarket. Some bankers also believe that a stabilization of currency rates could encourage borrowers to make more use of Deutsche-mark denominated loans.

There is now a massive eight percentage point difference between Euro-dollar and Euromark interest rates and if fears about the mark's revaluation potential can be laid aside borrowing in DM should be much more

For the moment, the dollar is still the favored vehicle and margins show no sign of hardening. Mexico, Indonesia, the Philippines and Algeria are all borrowing at terms that represent new lows for them while bankers continue to fret about the unwarranted narrowing in margins paid by prime and lesser-quality borrowers.

Mexico's Banobras is offering to pay ¾ percent over Libor for an eightyear, \$500-million loan.

Indonesia is raising \$300 million for 10 years, paying % percent over the London interbank offered rate (Libor) for the first five years and % over thereafter. Managers say the new low terms and the "tremendous response" are a recognition of the progress Indonesia has made in sorting out its financial problems.

The Phillippines, which is in the process of renegotiating all its existing credit lines, is arranging a 10-year credit of \$250 million at ¼ percent over

Banque Nationale d'Algerie is borrowing \$125 million for seven years at I percent over Libor for the first three years and 14 for the final four. It previously paid a split rate rising to 1% percent.

East Germany's foreign trade bank, DA Bank, is in the market for \$150 million, offering to pay % percent over Libor for three years and % percent over for the final four years.

South Africa is also borrowing \$150 million from a syndicate of West (Continued on Page 13, Col. 2)

able to discard their immediate of selling, but the fear of continued concerns about the future of the rises in short-term rates have kept dollar and concentrate on basics -which for the bond market means the direction of short-term interest rates. These were up half a percentage point on the week and prevented the rush of short-covering from fucling a rally.

The result of the week's developments essentially halted the wave

Soles in New Last Chige

surprising strength last week after dramatic dollar-boosting moves by the Carter administration broke the k of futures in precious metals and foreign currency.

After a lackluster showing early

By Sue Shellenbarger CHICAGO, Nov. 5 (AP-DJ) -

Grain and cotton futures showed

After a tackinster snowing earry in the week, wheat futures rose Thursday and Friday and cotton finished above previous season highs, while other commodity prices were still floundering on the dollar's rising value.

Most commodity futures traders lost sight of market fundamentals after President Carter's announce-

ment of moves to aid the dollar.

The surprise announcement strengthened the dollar and blocked the steep upward price climb of gold, platinum and foreign currency futures, which tumbled the maximum permissible amounts for two consecutive days.

Wheat futures finished the week with net price gains of about 3 cents a bushel but corn prices lost 2½ to 4½ cents and soybeans. which one analyst called "a glamour commodity that attracts [speculative] money from the stock market," were 4 to 134 cents lower.

"The soybean market is still fundamentally strong. Why anybody would want to sell grains because the dollar is stronger and metals are weak is beyond me. said one analyst of the grain selloff Wednes-day that parallelled the price trend

of silver and gold.

He discounted a popular theory that grain priced in U.S. dollars will attract many more foreign buyers in times of dollar weakness. "Our grains are still priced in the bargain-husement here," he said. "Many foreign users of our grains have held off buying waiting for the even larger corn and soybean crop predictions this week to a succes-

sion of government forecasts of continued at only a slow-to-moderat 1.81 billion bushels, compared with the government's 1.79-billion-bushel estimate in October, and the corn crop at 6.88 billion bushels, additional 150,000 ions of wheat. An additional 150,000 ions of corn was

Carter Moves Boost Grain, Cotton Futures reported sold to "unknown destina-

> Other government reports showed that a record quantity of soybeans, 21.6 million bushels, was processed last week at domestic crushing plants, and that an unexpectedly low quantity of vegetable oils, 738 million pounds, including soybean oil, is on hand in the Unit-

> ed States. The continiercial or exporter buying that supported corn prices for much of the week faded in quiet trading Friday. But analysts said that farmers, who seem to resist selling corn below \$2 per bushel, gave some price support by storing

Wheat Strength Surprising

the Dow Jones industrials boomed one day in their biggest gain ever and The strength in wheat prices surprised some analysts, who said reports of large winter wheat seed-It was a week of lightning changes that sent the dollar, gold bullion, and ings in the Midwest combined with the prices of stocks and bonds rattling about wildly in response. The Dow Jones industrial average showed a net advance of 17.06 points, to finish at relatively quiet export markets seemed to have little effect.

In other countodities, Mr. Carrer's moves disoriented traders accustomed to a progressively weaker dollar and higher commodity prices. Among the agricultural commodities and metals, only wheat and cotton were higher for

the week.

"The bubble burst last week." said one analyst, "Speculators had become unaware that the markets go in both directions. There were a lot of unsophisticated speculators taking on enormous positions in gold, feeling that the only way it would go was up. They were right, of course, but only for a few

On New York's Commodity Exchange, gold finished the week \$23,50 an ounce lower for the Noveniber delivery, at \$214 an ounce, and silver was 35.8 cents lower at \$5.79 1-2 an ounce, Copper, which showed date-week strength on ru-

# Pick up Security. Pick up some gold.

Gold is a vital part of any investment portfolio providing a long-term hedge against capital erosion-What, then, has been preventing you from investing in gold? The formalities of buying and selling it? The difficulties of handling it? If so, take a look at the Kruger-

The Krugerrand is a gold coin containing exactly I troy ounce of fine gold. As it is legal tender you can buy it at practically any bank. Without fuss. Without form alities. Just put your east on the desk and carry off your Krugerrands. Now, the other side of the coin: economy. The Krugerrand doesn't carry a collector's. surcharge. And its gold premium is the lowest of all gold coins - only 7%. So the Knigerrand is the hest buy when | \til you consider gold.

And the most flexible gold when you re-sell it. Because again there's no red tape. And its coin form enables you to sell it exactly the way you would like to: ounce by ounce.

So whichever way you look at it, it's not only an ounce of pure gold. But also a pound of pure common

Krugerrand
The cash-and-carry gold. Traded by banks in Germany, United Kingdom, Switzerland, Nether lands, Belgium, Luxembourg, Austria, Denmark, Andorra. 5267 2 1-16 134 2 + 34

# Sometimes even kings had to rely on the resourcefulness of merchant bankers to mobilize funds.

Without the ingenuity of merchant. bankers many a coronation might not have taken place.

Emerging industries and govern-ments also relied on these financial craftsmen to achieve their goals.

BHF-BANK traces its proud history to the mid-nineteenth century when its founders were among the most influential merchant bankers of their time. From the outset, they specialized in assessing new projects, helping to create new industries and tapping available sources for the necessary funds.

Traditional merchant banking expertise is the cornerstone of BHF-BANK's strong position in inter-national underwriting today. The

Bank ranks among the top managers of DM issues and regularly acts as co-manager of dollar issues.

BHF-BANK continues to concentrate on what it has always done best: acting as advisor to corporations, governments and public entities on the most suitable means of financing, selecting the appropriate instruments, putting together a syndicate, or arranging for private placements. The Bank is also well placed to initiate stock exchange listings in Germany.

For the unrivalled financial expertise of a management with personal liability, rely on a merchant banker. BHF-BANK.

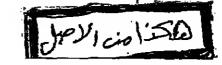

Merchant Bankers by Tradition. Resourceful by Reputation.

### Johannesburg Consolidated Investment Company, Limited

(Incorporated in the Republic of South Africa)

Extracts from the Chairman's Review by Sir Albert Robinson

Results for the Year

During the financial year to 30th June 1978 the profit after tax evailable to ordinary shareholders, but before an extraordinary item to which I shall refer later, amounted to R42.2M compared with R27.0M a year ago. During the year the Company obtained additional finance of R40M through a preference share issue to augment its normal cash flow Largely as a result of this step the net current assets of Johanics and Its financial subsidiaries showed a substantial improvement at the year end and is adequate to meet our commitments.

Future Commitments

The Company will still have to nect calls upon its cash resources in respect of Otjihase Mining Company (Pty) Limited, Shangani Mining Corporation, Limited and Consolidated Metallurgical Industries, Limited. We have reduced our obligations by meeting guarantees of R17.5M in respect of Otihase's long term loans. The accounts reflect an extraordinary provision of R44.4M. This together with the provisions of R18.2M, in last year's Income Statement, cover the full write-off of Johnnies' investment in Otjihase. With regard to Shangani greater clarity on the political front in Rhodesia during the next year, and the prospect of better nickel prices will enable a longer term view to be taken. Johnnies' investment, by way of equity, loans and guarantees in respect of loans raised by Shangani, amounts to R23.1M, of which R3.9M has been written off.

Consolidated Metallurgical Industries Limited has established itself remarkably quickly as a low cost producer of good quality ferrochrome. The company has reduced its output to one of its twin stream operations. Arrangements bave been agreed for shareholders to provide R10M of equity and R10M of convertible loan stock.

Provision bas been made to meet the calls on Johnnies by these three companies during the current financial year.

Plathama

The Company's investment in Rustenburg Platinum Huldings Limited is once again showing considerable promise with the rapid and satisfactory strengthening of the platinum price. At the low prices that prevailed over the past three years Rustenburg was operating at marginal profitability and was obliged to pass two dividend distributions with the result that Johnnies did not receive any dividend income from this source during the year under review However since the year-end Rustenburg has published most encouraging results

and it has declared a final dividend of 8 cents per share which will be reflected in Johnnies' results for 1979.

Gold The planned expansion at The Randfontein Estates Gold Mining Company, Witwatersrand, Limited has been completed ahead of schedule. Randfontein is one of South Africa's premier gold and uranium mines and Johnnies is proud to have been involved in its development and operations over so many years.

Western Areas Gold Mining Company Limited recently achieved a record milling rate when it milled 1,072,000 tons of ore in the September quarter. As a low grade mine it is benefiting both from the rising gold price and the increased throughout.

Tavistock Collieries Limited has enjoyed another successful year increasing its profits after tax to R12.0M.

Authory Consolidated Murchison Limited is experiencing difficult trading conditions and it will be difficult to maintain the current level of production. However, the market for antimony has always been cyclical in nature, and the long term demand for antimony oxide as a flame retardant gives reassurance for the future.

Exploration Our prospecting teams are engaged in the search for uranium ore bodies in the Karoo. We are also active in the search for coal and in the re-examination and re-evaluation of our coal rights in the Eastern Transvaal and in Northern Natal, In the field of base metals we are examining various occurrences to determine whether or not these could be of sufficient size and quality to be of interest.

With the rising price of gold our mineral rights on the West Rand in the vicinity of Randfontein Estates and Western Areas begin to acquire more significance.

Industry .

Our industrial investments contributed R11.0M to net attributable earnings for the year, an improvement of 12% over the corresponding figure a year ago.

Future Prospects Both the Republic of South Africa and Johnnies have weathered a very difficult three years. Although the growth of the United States' economy was satisfactory last year, the persistence of a massive trade deficit and a resurgence of inflation threaten to reduce the rate of growth during the year shead. The world economy in fact, appears

to be faced with the possibility of another shift into recession in 1979, before South Africa has a chance to recover fully from the accumulated setbacks since the end of 1974 when the gold price reached its previous pcak.

For the Republic I regard the high rate of inflation as one of the pressing problems to be overcome if we are to maintain our trading position in world markets. Another problem is the need for a faster rate of economic expansion to make provision for the employment of the ever increasing numbers of those seeking work. For Johnnies, our objectives must be w continue the policy of reducing the level of debt and to improve productivity at the operating levels in all our business activities. Our investments spread across a diverse range of metals and industries, and accordingly our results for the coming year will depend to a large extent upon world economic circumstances. Nevertheless we are hopeful that the level of profits will permit us to increase the Johnnies dividend during the

current year. It seems likely that in 1979 hoth Rhodesia and South West Africa will establish non-racial societies run by black majority governments. South Africa has played a major part in hringing about these changes, hut, in doing so, it has stimulated the demand for change at home, and this is the

challenge that faces the new government.

The Government is studying new constitutional arrangements for the white, coloured and Indian communities and I share the view of those who believe it will be impossible to exclude the blacks, and particularly the urban blacks. If this were to be accepted as official policy, there is every chance that a new constitutional framework could emerge that will gain support from influential members of the international community To assist in this process of change and indeed to accelerate it. South Africa needs understanding encouragement and, above all, investment from abroad. As the economy expands and becomes more sophisticated so the oppor-. tunities for training and employing all races. are increased. This leads to higher standards of living for all, which is the key to inter-racial harmony. I wonder if those who plead for disinvestment in South Africa pause to reflect upon the unemployment and chaos that would result if they succeeded with their campaign. I have no doubt that the withdrawal of foreign capital and the imposition of sanctions would be counter productive and would slow down the process of change, as those in anthority responded by mobilising all their available resources to defend their very existence. On the other hand if South Africa can build a political and constitutional structure to satisfy the majority of its peoples then there is no limit to the development of its economic potential. Where possible Johnnies will play its part in the financial and economic fields to assist in the process of constructive and meaningful change.

Copies of the full Statement and Report and Accounts are obtainable from the London Secretaries: Barnato Brothers Limited, 99 Bishopsgate, London ECRM 3XE.

Redemption at par in 15 almost equal annual instalments from December 1, 1979 until 1993.

Application has been made for quotation of the Debentures on the Amsterdam Stock Exchange.

Subscription will be open from November 10, 1978 at 09.00 hrs. and will be closed at 15.00 hrs. on that date.

Date of payment: December 1, 1978.

NEDERLANDSCHE MIDDENSTANDSBANK N.V. Amsterdam, November 3, 1978.

To manage the financial resources of one of Europe's largest oil producers, a man must be farsighted and decisive.

Edward A. O'Neal, Vice President and General Manager, Chemical Bank, France.
Photographed at Elf Aquitaine's facilities in Lacq, France.

André A. Gester is treasurer of Societe Nationale Elf Aquitaine, one of Europe's largest petroleum companies. It is his responsibility to meet the challenge of financing the development of his company's vast oil and gas Elf Aquitaine, this development is very costly - running into billions of dollars,

To turn a search for energy into reality takes a lot of cooperation with other petroleum companies and capital from many international banks. Over the past three years, Andre Caster has furned to bankers he can

rely on. Bankers like those at Chemical Bank - the sixth largest U.S. bank. The reason Elf has turned to Chemical Bank is bankers like Edward A. O'Neal

of Chemical Bank's Paris office. O'Neal has made it his business to understand the business of Elf Aquitaine. Working closely with the head of Chemical's Petroleum and Minerals group - Europe, he has been able to deliver the kind of financial help Elf needs - wherever Elf needs it.

"Chemical Bankers know what we mean when we say 200,000 barrels a day, Mr. Gester says. "And they know that a balance sheet can't show reserves. But their engineers can evaluate those reserves. O'Neal and the Chemical Bank team can instantly see where our future lies."

Now that Elf Aquitaine has moved into big ventures in the North Sea oil and gas fields, O'Neal together with . his team of experts, is there with

realistic and timely financial solutions. Andre Gester sums it up well. "We need a lot of money. And we can get a lot of money. But the important thing is that we get fast decisions." Rapid, professional solutions are what Aridre Gester has come to depend upon. He knows he has bankers with financial expertise who are farsighted and responsive to his

While theirs is a professional relationship, Andre Gester and Ed O'Neal will tell you that it is also personal and rewarding. That's what usually happens when corporate officers get together with Chemical Bankers. And what results is bottom line benefits for both the company and the

College & Price Vol. Land Vol. Land

Our ears don't close when the doors shut.

After all, our officers care about your business almost as much as you do. They care enough to learn it thoroughly. They care enough to learn your business language instead of forcing you to talk bankers.

So naturally they also care enough to work late when you have problems to work out.

We take the time to tailor each solution.

Because we try to understand your husiness better, we can offer you better financial solutions. A solution that is custom-made to fit your specific problem. Rather than the standard, off-the-rack solution that any bank can give.

Our international network is always open to you too.

We have more than just 1060 retail branches in Belgium. We also have a worldwide network

through subsidiaries, representative offices, affiliated and associated banks, correspondents and through memberships in banking communities like SFE and Associated Banks' of Europe (ABECOR).

This international network can offer you long distance relief for your international business problems. As well as provide you with the same range of services as any major international bank.

But what makes us different from these other banks is our individual attention to each client's individual needs; our reluctance to stick to the same old answer; and our willingness to do a little extra for our clients.

ents. Like occasionally missing the last train home.

Banque Bruxelles Lambert banking, a matter of people

We are the ABECOR bank in Belgium. Marnixlaan 24, 1050 Brussel. Tel. 02/513.81.81. Telex 26392 BBLIN

# Glaxo a world leader in pharmaceuticals builds for the future

"Though the difficulties of international trading tend to increase with the passage of time and the growth of control and regulation by governments, there is overall an enlarging demand for the Group's research-hased products. Naturally in a Group as big and as widely spread as Glaxo the pattern is not uniform and, though sales increased, the rate of increase was not up to that of recent years"

So says Mr. Austin E. Bide. Chairman and Chief Executive of Glazo Holdings, in his Statement to Shareholders on the trading year 1977/78.

Nevertheless, the year was, in a number of ways, a significant one for the development of the Group's international trading.

Development of worldwide trading and new capacity to meet increasing demand

In the United States, the purchase of Meyer
Laboratories Inc. has provided Glaxo with an already
profitable direct outlet in an area which represents 22%
of the free world market in pharmaceuticals. An
experienced and effective sales force in the U.S. will be
expanded as Glaxo products are added to the Meyer
portfolio and a significant and steadily increasing
contribution to profit is confidently expected.
Increasing demand for Glaxo products has necessitated

the expansion of production facilities at home and abroad. In the U.K. the new factory at Annan is now substantially complete. Production facilities will be tested during the next six months and then progressively commissioned to provide greatly increased capacity for the production of labetalol, the basic ingredient of the new anti-hypertensive which is confidently expected to become one of the Group's most important and profitable products. Factory facilities at Barnard Castle and Montrose have been significantly expanded, a new installation for the production of anti-asthma aerosols opened at Speke and work is in hand to provide extra capacity at Ulverston.

Overseas, too, the story is the same.
In Europe, a new factory in Spain is now operational and another in Greece is nearing completion. Work has hegun on an extension to the German factory, whilst additional capacity in Italy for aseptic antibiotic production, and in France for ointments and aerosols, is now being created.

In the Americas, betamethasone and aerosols are now heing manufactured in Mexico and an aerosol unit in Argentina will soon he in operation. In Asia – in Pakistan, India, Thailand and Malaysia – production facilities are heing upgraded and expanded and in Australia a plant for alkaloid extraction has heen completed and the installation of an aerosols manufacturing unit is planned during the current year.

Three new products successfully launched
With no less than twelve major new products launched
in the past ten years, Glaxo can be proud of its record in
the research, development and marketing of ethical

pharmaceuticals. In 1977/78 this record was maintained by the successful launching of three more new products. A new injectable cephalosporin antibiotic – a major product of Glaxo's research and development programme currently running at £25 million a year – has already been marketed in the U.K., Ireland, Hong Kong, Germany and Italy. It will enable the Group to enter the highly competitive U.S. market with an important new antibiotic and increase the market share in most countries where Glaxo cephalosporins are now sold.

The range of topical steroids was also extended by the addition of a new product and a new influenza vaccine was successfully launched in the U.K.

Sales of Glaxo's important anti-asthma products

continued to grow. The Group further consolidated its leadership in the U.K. ethical veterinary products market and expects to take an increasing share of this growing market at home and overseas.

### The Future

Commenting on the future, Mr. Bide eays: "An international company like Glaxo is exposed to the multivariety of hazards that this world provides in increasing measure. At the same time, however, such a company with the right products, the right staff and the will to succeed does not lack great opportunities for progress.

progress.
Your company satisfies these conditions and will
continue to do so; and – as I have written before – though
its rate of growth must vary from time to time, the trend
is progressive. I see no reason to euppose that the future,
in these respects, will differ essentially from the past".

Herald Tribune

The international essential

(Continued from Page 7) develop. In addition, there is little danger of a flood of new dollar issues as rates are currently too to be attractive to borrowers.

Bankers report that a Nordic borrower is contemplating issuing seven year paper denominated in special drawing rights - the artifispecial drawing rights — the artificial reserve currency created by the International Monetary Fund. However, now that the dollar's erosion has been halted, there is considerably more doubt whether investors could be attracted to an 8½-percent yield on such paper when the yield on dollar bonds is so much higher.

In the Deutsche-mark sector, prices were marked down by I per-cent on average last week. But dealers said this was mostly defensive, in anticipation of a wave of foreign sales after the Washington package was announced. The selling wave did not occur and dealers note that foreign investors continue to buy DM securities. However, rather than buying Eurobonds, the money appears to be going into the highly liquid domestic market for short-

yields are more attractive.

The recent 6-percent issues for the Coal and Steel Community and European Investment Bank were trading about a point below issue price while the Council of Europe. benefitting from its 6%-percent coupon traded at 99%-100. Ban-kAmerica with its low 5%-percent coupon continued strong at 99%-100, reflecting the scarcity value of prime U.S. names in this market. In light of the mark's decline

against the dollar, the expected non-European government borrower that Commerzbank was to have brought to market last week was cancelled. Scheduled for this week is a 150 million DM, 10-year issue for Finland, which will be managed by Dresdner bank without any co-managers, and a 50-million DM, five-year issue for Hitachi

Shipbuilding.
Still on offer in the convertible market is the 50 million DM loan

for NYK Lines.
The 100 million French franc issue for Unilever USF Investments was priced at par with a coupon of

### Carter's Actions Boost Grain, Cotton Futures

(Continued from Page 7) mors of South American and African production problems and strong merchant demand, closed 1.65 cents a pound lower.

On the New York Mercantile Exchange, platinum lost \$29.30 an ounce for the January delivery, to

close at \$345.60.
As metals plunged and the dollar regained large chunks of its average 30 percent depreciation this year, foreign currency futures on the Chicago Mercantile Exchange plunged as far as the daily trading limit for four days in a row.

Cotton futures closed 0.2 cents a pound higher for the week, at 69.65 cents a pound for the December delivery on the New York Cotton Exchange.

Increasing demand for cotton, including buying interest on the part of China, combined with possible damage to the Soviet Union's cotton crop and known damage to the domestic crop, aided prices, an-

Interest-rate-sensitive futures, including lumber, plywood, GNMAs. and Treasury bonds and bills, were volatile. Lumber and plywood futures on Chicago markets showed substantial losses by week's end as the view that rising interest rates will depress the housing iodustry seemed to prevail.

Long-term Treasury bond and GNMA futures on the Chicago board of Trade were higher for the week, after they source will imbrove and interest rates fall over cent over Libor. the long term.

On the Chicago Mercantile Exchange, live cattle futures howed slight losses after being friven first down, then up, by the laily trading limit on Wednesday ind Thursday.

> December cattle futures were .18 ents a pound lower for the week, at 54.27 a pound. Hog futures (\$1.2 billion). lropped by .77 cents a pound, to

Heavy speculative interest in catfutures was responsible for some of the price swings, said one ana-ysı. Surprisingly high cash prices or slaughter cattle lent late-week uppon. Also, demand is unusually trong for the Thanksgiving season, nalysts said, when consumers usuily prefer turkey to beef.

es conunues as most traders believe that the size of U.S. cattle herds

will drop sharply by early next year, analysis said. Hug futures trading was quiet. with little news to influence prices.

### Luroloans

### Stock Trade Is Uneven

(Continued from Page 7) willing to take a recession in 1979 and then head into election-year 1980 with flying colors and a lower

But aside from all the guessing that went on in Wall Street, the market seemed in send out one strong signal — namely, that it be-comes a buy when the Dow indus-trials sag to the 800 area, and it turns into a sell when the average hits 900.

The week's trading opened on a decidedly dismal note. As one brokerage-house partner declared at the time: "Stocks are in a free-fall, and the parachute doesn't seem to

On Monday, however, the mar-ket staged what some analysis called "a traditional selling climax." Shortly before noon that day the Dow was behind by more than 17 points, and the New York Stock Exchange tape lagged floor transactions by 35 minutes — a record delay for the present report-

Theo the market reversed course and finished with the Dow ahead by nearly 6 points. Big Board-vol-ume soared to 59.48 million shares, making it the third busiest day in

But selling resumed on Tuesday, with speculative and secondary issues hit particularly hard. Much of the pressure came in forced selling for margin accounts, where traders earlier had bought stocks on credit. There was not a single yearly high registered that day on the Big Board, and the Dow plunged more than 19 points, dropping through the 800 level to land at 792.45. That brought the decline in the average to 104 points within a dozen trad-

Gold Set Highs

Meanwhile, the price of gold bullion had soared to record highs, and the dollar had slumped to record lows against other major currencies. The yield on two-year Treasury notes rose to 91/2 percent, and the government securities mar-

Then came the spectacular reversal of Wednesday. Gold prices tumbled and bond prices rallied, along with equities. The dollar gained sharply against the Japanese yen and European currencies.

On Thursday, bowever, investors were due for another surprise. Instead of extending its recovery, the market fell back again. The ingredient lacking was participation by foreign investors, who had helped to fuel the big rally starting in April.

This announcement appears as a matter of record only.

### Winter Games Organizers To Ask \$10-Million Loan

LAKE PLACID, N.Y., Nov. 5 - Organizers of the 1980 Winter Clympics say they are seek-ing a loan of as much as \$10 mil-lion to deal with anticipated "cash flow" problems.

But they said that they are get-ting their multi-million-dollar cost overruns and other financial problems under control and expect to bave a balanced budget in time for

the February, 1980 games.
"We're implementing proper management practices . . It's no longer Dreamsville," said Petr Spurney, the \$100,000-a-year administrator, hired to solve the problems plaguing preparations for An administrator with a reputa-

tion for pulling deficit-ridden oper-ations out of the hole. Spurney has been given broad powers to shake up operations of the committee and ose tight controls on spending. Until his hiring, the committee was run largely by local business-

and sports enthusiasts, none of whom has had experience stag-ing anything of the scale of the Olympics.

Besides the projected deficits it

currently faces, the organizing com-

mittee has been dogged in recent weeks by reports of high, expenseaccount living by committee mem-bers, and conflicts of interest.

"I'm aware of nothing illegal or criminally wrong," said Spurney. "Some things may have been improper, but I'm looking into everything to assure we're getting the best services for our money."

Recently, it was disclosed that

Olympic organizers had awarded an \$800,000 oc-bid contract to a hastily formed insurance company. whose two principals are employees of a company owned by their uncle, Jack Wilkins, a powerful member of the Olympic organizing commit-

Spurney refused to say whether he regarded that as improper, although he said be would avoid such practices in the future. But he said that the contract itself appeared to be one in which the committee was getting good service for its money.

The most immediate problem the communities faces is a projected deficit of as high as \$25 million according to federal officials - in the administrative budget. Most of the construction of new facilities for the Olympics is being funded by state and federal money. But the administrative budget must supply the money for a bost of other items, ranging from furniture for the Olympic village to the salaries of the organizing committee.

The latest committee projection placed the size of that budget at only \$18 million. But Spurney said that the \$59 million figure represented a "wish list," but be ac-knowledged that even with a scaled-down budget of \$40 million or \$50 million, the committee still faces problems.

In December or January, he said, the committee is expocuted to run out of cash for administrative expenses, and will be unable to meet its short-term obligations. There is no cause for alarm. Much of our income will come in closer to the games." he said.

But in the meantime. Spurney said that be hoped to deal with such "cash flow" problems by securing a line of credit of up to \$10 million at a bank. "This is not unusual. Most big corporations have lines of credit," Spurney said. "There's a lot of things we can do to raise money. I'm optimistic we'll

Construction costs are also currenty running at least \$14 million over the original projections of \$70 million in state and federal money.

### New Zealand Beats Ireland in Rugby

DUBLIN, Nov. 5 (AP) - Andy Dalton scored a fine try in the corner in the last seconds yesterday to give the New Zealand rugby union team, the All Blacks, a 10-6 victory over Ireland.

The Irish equalized twice in a brave display, but finally bowed to the weight of New Zealand attacks. The teams were tied, 1-1, at halftime. The match went into injury time and appeared certain to end in a draw when the All Blanks got a dramatic winning try. Andy Haden, the star of the New Zealand pack, took a ball from a lineout and slipped it to Donaldson. Dalton raced for the corner, took Donaldson's pass and dived

THE STAKES HAVE NEVER BEEN HIGHER, THE PROBLEM NEVER MORE COMPLEX.

# CHANGE

The third in a series of working conferences sponsored by

the International Herald Tribune and Forex Research Limited

LONDON, November 20 and 21, 1978.

Secretary of State for Economic Affairs, discussing the dollar and the EMS. Jacques van Ypersele, Chairman of the EEC Monetary Committee, arriving from his November 20 meeting with the Common Market Finance Ministers to report on "Formulating a European Monetary System." And Guido Honselmann, General Manager of the Union Bank of Switzerland, discussing the impact of the EMS on the Swiss franc.

Don't miss Richard N. Cooper, U.S. Under

A comprehensive problem-solving examination of currency exposure, this two-day conference will focus on the corporate treasury and decisionmaking aspects of the problem.

Case studies - by treasurers from Nestle, Gulf Oil, Hunter Douglas, Tate & Lyle and other major

corporations - will treat risk and probability analysis, medium-term techniques and computerbased exposure systems.

Bankers from Amro Bank, Deutsche Bank, Lozard Freres, Morgan Guaranty and Goldman Sachs will discuss cash management techniques, international financing and multicurrency borrowing.

Other key speakers will include Edward M. Bernstein on "An Exchange Rate Policy for the Floating Dollar" and Guido Carli, President of the General Confederation of Italian Industry and former Governor of the Bank of Italy, on "Sharing the Burden of International Financial Responsibility."

Be sure your company is represented. Complete and return the registration form below today.

### REGISTRATION FORM Please type or use block letters.

WAR AND REMEMBRANCE By Herman Wouk, Little-Brown, 1042 pp. \$15. Reviewed by Christopher Lehmann-Haupt

TIERE in case you missed it, is World War II — the Fall of Singapore, the Siege of Leningrad, the Battle of Midway, Leyte Gulf, Overlord, Hiroshima — the whole shooting match; with grim and special emphasis on the Nazi death camps and the attempted genocide

of European Jewry.
You are there, in Herman
Wouk's ninth and longest novel,
the inevitable sequel to "The Winds
of War," in which the world, the United States, and Navy officer Victor "Pug" Henry hurtled to the brink of the war. In "War and Remembrance," you are aboard a submarine that sneaks into Lingay en Gulf and nearly gets sunk. You fly a dive-bomber that helps destroy a Japanese aircraft-carner at Midway. You escape from Auschwitz and carry films of Nazi atrocities to an unbelieving world. You meet the great and near-great, the super-heroes and the super-villains: Franklin Roosevelt and Joseph Stalin, Chester Nimitz, Vice Admiral Chuichi Nagumo and Adolf Eichmann. You even attend a dinner party at which Dwight Eisenhower appears with Kay Summersby, "the woman that all the gossip was about."

It is sometimes downright awe-some — watching the Battle of Leyte Gulf unfold from the point of view of Pug Henry; being trans-ported on a train to Eastern Europe in the failing body of Pug Henry's Jewish cousin-in-law Aaron Jastrow, seeing the sumburst at Los Alamos through the eyes of Henry's son-in-law, Simon Anderson. And particularly awesome are the battle-pieces — which Wouk presents from at least three points of view so that even the dumbest of us can comprehend.

### Contrived

Why then is it so hard to keep a faint note of flippancy out of one's voice when writing about "War and Remembrance"? Because, while Wouk's huge novel is fun to get lost in, it is best not to think about it too strenuously. If you do, it occurs to you that there is something rather contrived — even silly — about the uncanny ability of the Henry family to be everywhere that matters. It's well enough for Wouk to argue, as he does in "The Winds of War," that there have been many hike Pug Henry throughout history
— small men plucked out of obscurity to serve the uses of the great, only to be dropped back into ob-

But it's a bil much asking us to believe that one such man could have been present at almost every major battle of the Pacific campaign, as well as on the Russian battlefront, and at the Teheran and Potsdam Conferences, all the while conducting himself with such distinction and honor that generals beg for his opinions and presidents assign him to solve their most ticklish problems. Even as a symbol of tough-minded American competence, Pug defies credibility. Posterwould have heard of such a man. Posterity would at least have

made him chairman of the Jo Chiefs of Staff.

ler:

Moreover, when you stop a think about it, there is someth jarring about the way Wouk's st unfolds. I don't mean to sugg that the Nazi death camps are no fit subject for an histori romance. But it is in some sens trivialization of history to emp old-fashioned tricks of plotti such as the chapter-end. cliffhanger, in dramatizing si grave events.

### Caught in a Maelstrom

Then there is the matter of talie Jastrow Henry, Pug Hen Jewish daughter-in-law, who fi herself in Italy at the start of war and in the course of the boo-gradually sucked towards A chwitz, like some tiny creat caught in the current of a m strom. Natalie's misadventures " at the very center of "War !" Remembrance." According Wouk, it is she and what she sta for that Pug Henry is really fight: for in the Pacific, whether he re-izes it or not. And as she come; understand her fate, she gr more and more conscious of Jewishness, of the impossibility, assimilation, and of the appeal Zionism. By the end of the no. the uppermost questions in reader's mind are: What will Na ie do if she survives Auschw How will she resolve her marri ... to Pug's son, Byron, with the ph. was sophical necessity of her settler.

It would be giving away much to reveal how Wouk ansy these questions—or even to rewhether Natalic survives at Suffice it to say that having est lished her fate as the question the book work simply large. answer — a surprising lapse considering his willingness to add and every other moral issue raised ? the war, from the ethics of the Monday, the nature of the evil of Adolf E

in Palestine?

Oh well, no one who has  $\epsilon_{2,1}$  read Wook's fiction over the  $y_1$ would ever argue that he is on you of entertainment. He fudged central issue in "The Caine M."

by pretending to be on the of the mutineers until it suited to bring on Barney Greenwald, he has been fudging off and on since. The important thing, I gu is that he can be splendidly er-taining. Don't think about "fall!" and Remembrance" too much you'll have a wonderful time.

Terrapins.

### Ohio State 49, Wisconsin 14

At Madison, Wis., Ohio State, its offense bogged by mistakes, stunned Wisconsin with two spectacular scoring plays and took advantage of seveo turnovers to de-feat the Badgers, 49-14.

The victory gave the Buckeyes a 4-I Big Ten record and 5-2 overall. Wisconsin, which has been out-scored, 146-16, in its last three games, dropped to 2-3-1 in the con-ference and 4-3-1 overall.

The big plays — a 96-yard kickoff return by Ty Hicks and a 61-yard interception return by safe-ty Vince Skillings — enabled the Buckeyes lo survive until their de-

### Nebraska 63, Kansas 21

At Lawrence, Kan, Craig Johnson, who runs as the third string I-back behind I. M. Hipp and Rick Berns, scored three louchdowns on runs of 64 and 60 yards and a pass reception of 78 yards to propel Nebraska to a record-setting 63-21 rout of Kansas.

Johnson rushed for 192 yards in 10 carries to help Nebraska set a school total offense record of 799 yards in winning for the eighth lead from 23-14.

Nebraska rusbed for 516 yards and passed for 283 vards to-break the previous total offense record of 655 yards set against Hawaii in 1976. Quarterback Tom Sorley ignited the rout by completing 7 of 8 second-quarter passes for 170 yards and three muchdowns, including a pair of 44-yard scoring strikes.

USC 13, Stanford 7 At Stanford, Calif, tailback Charles White ran for 193 yards and one touchdown in pacing Southern California to a 13-7 victory over Stanford.

White pushed his season total to more than 1.200 yards in becoming the third leading ground gainer in Pacific-10 Conference history.

The junior scored on a I-yard dive with 37 seconds remaining in the first half as Southern California, a 7-point favorite, scored its fourth victory against one loss to stay alive in the Rose-Bowl race. It also was the Trojans' seventh victory against one loss overall.

Stanford quarterback Steve Dils had 23 completions for more than 200 yards and became the Pac-10's single-seasoo leader with 217 completions. The loss left the Cards at 2-3 in the league, 5-4 overall and probably spoiled their chances for a post-season bowl invitation.

### UCLA 23, Oregon 21

At Los Angeles, fullback Theotis Brown unleashed dazzling touch-down runs of 74 and 68 yards in the fioal period and UCLA, frustrated for three quarters by a tough Oregoo defense, defeated the Webfoots, 23-21. The victory was the sixth in a

row for the Bruins and kept them atop the Pacifie 10 football race with a 6-0 record.

Brown rushed for 274 yards on 26 carries to break his own UCLA

single-game rushing record of 220 yards, set against Washington in 1976.

Oregon didn't go quietly. Web-foot quarterback Tim Durando scored on a 1-yard run with 33 seconds to go and Pat English kicked the extra point to cut the UCLA

### **East Germany Takes** Five Rowing Crowns Zealand third, three-quarters of a

Men's Finals

land, Nov. 5 (AP) — East Germany stormed away from rival West Germany in the eights today to confirm its place as the world's strongest

rowing nation.

The East German victory in the glamor event of the world rowing championship gave them five gold medals of the eight contested in the men's events. They picked up two second place medals in their display of power rowing, and three golds and a silver in the women's

finals yesterday.

The East German squad started its string of victories with a close triumph over West Germany in the men's fours, which they won last year in Amsterdam.

Norwegian brothers Alf and Frank Hansen, rowing with superb precision in the ideal, almost windless conditions, won the double sculls easily from Britain and Switzerland.

It was the turn of the East German twin brothers, Bernd and Jorg Landvoight, next. They won the coxless pairs from Britons John Roberts and Jim Clark hy a length. The Landvoights have won the world championships four years in

West German Sculler Wins

The West German squad, which was expected to provide the toughest competition to East Germany, won one gold medal on the performance of 25-year-old sculler Peter-Micbael Kolbe, who beat the highly rated East German, Rudiger Reiche, by half a length. Olympic champion Pertti Karpinen finished next-to-last, in fifth place.

East Germany's most surprising reverse came in the men's coxless fours, an event they have won since 1969. The burly Soviet crew came out at the start ahead of the field and led all the way, fighting off a desperate challenge by the East Germans to take the gold medal by less than a meter.

This gave the Soviet Union its only medal in the men's events. They won a gold, two silvers and a bronze in the women's competition. In the men's competition.

In the men's coxed eights, the final event of the championships, the East Germans pulled away from the field at the 1,500-meter mark, closely challenged by West Germany, New Zealand and Australia.

### Last-Minnte Push

In the final 100 meters, the East German crew increased its rate and won by half a length, with New

length away.
The weak U.S. men;s team was outclassed by the European compe-tition. The Americans finished fourth in the coxed fours, fifth in the double sculls and last in the coxless pairs. However, the

women's team won a silver and a bronze in yesterday's events. British double scullers Mike Hart and Chris Bailiieu, and coxless pair Jim Clark and John Roberts put up

splendid performances against the world's best in their events. In the coxed fours, Czechoslovakia provided the main opposition to East Germany, although the Polish pair pushed the Germans hardest over the first 500 meters and

held on for third place. East German Christine Hahn, 24, again showed herself as the finest woman rower in the world with a convincing victory in the women's single sculls yesterday. Hahn, who won the gold medal at the Olympics in 1976 and the World Championship in 1974, 1975, and 1977, handled the windy conditions with style.

### Rusians Break Away

Sheer power drove the Soviet Union women to a gold medal in the eights. East Germany was fa-vored to retain the title they won in Amsterdam last year, but after the first 300 meters, the Russians made a runnway of the race.

The Soviet women were the only crew all week to hreak three minutes, winning Wednesday's heat in 2:59.2. They took longer under worse conditions in yesterday's final, but routed the East Germans, who lost three of the six titles they won last year.

Bulgaria won the double sculls and quadruple sculls, and the East Germans the coxed fours, the coxless pair — by a whisker from the Canadians — and the single sculls, with Hahn retaining the title she has won every year since 1974.

Canadian Betty Craig and Susan

Antoft captured the women's coxless pairs silver medal when they finished 2.2 of a second behind the East Germans.

The other close race was in the double sculls, where Americans Liz Hills and Lisa Hansen snatched third place from Norway by one hundredth of a second in the last

# If Dress Is Message, 'Gucci Gucci Coo'

By Russell Baker

NEW YORK — As Americans wealth through their shoes. On lose the ability to speak meeting a New York man, one incoherently to each other in words, they speak increasingly in clothing, jewelry, gimeracks and hair. Just the other night. I met a woman the other night. I met a woman the confidence of the co whose finger told me she was divorced. The finger bore the latest thing in talking jewelry — a divorce ders. The battered jeans, swenters

ring. A divorce ring looks like a wedding band. but has a crack in it and costs \$300-\$350.

An expensive way, you may say, of notifying strangers that you have been in and out of marriage. and so it is: but in

Baker the age of talking costumes it is a commonplace sum to pay for the pleasure of avoiding conversation. In Henry James's day, this wom-

an and I might have had a subtle conversational encounter during which I might have ingeniously extracted her story. These days it is no longer necessary. Her Florentine purse instantly told me everything I needed to know of her reckless disregard for money, which had doubtless led to the divorce. More-over, my Brooks Brothers suit and pation, although, as we now know, my naked ring-finger told her every thing she needed to know about me — that I was not an adventurer, that I was married, and that I was devious.

All this was announced by the suit, which said, "Married, not adventuresome," and the absence of a wedding ring on my maritalstatus communication finger, which said, "He is trying to conceal his married state.

After my dreary old button-down collar had assured her that I had no eye whatever for chic, we moved apart having communicated everything without having spoken a

Life is full of these mute exchanges nowadays. In certain homosexual circles, I understand, aficionados of the sado-masochistic endeavor communicate absolutely everything about their personality quirks by the manner in which they wear leather and metal. A can opener worn on the left hip signals a taste for plum brandy; a leather eye patch draped over the Adam's apple, a liking for old W.C. Fields films, and so on.

In New York at least, males of the moneyed class announce their column.

New York men now commonly dress above the ankle like sheepherand fur-lined suede say, "Don't care about the worthless material things of life." The Gucci sandals immediately correct any possible misapprehension by declaring.
"But don't get me wrong, Buster, I can afford it all if I want it."

Psychologists have long held that dress is a way of telling people in fast shorthand what you want them to think of you, and of course, what you want people to thiok of you is often misleading if not false. Most of us, in fact, do not have much idea who we are most of the time. but we solve the problem by slipp-ing into false identities which can be slapped together with costume and jewelry.

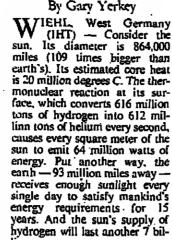

The conventional rebel costumes of the '60s — jeans, granny dresses, wire-rim specs, bushels of hair, etc. - became such a universal uniform that the more timid citizenry felt itall those young soldiers of protest were just as puzzled about who they were as the rest of us.

I bring this up because of a per-sonal oddity recently noticed. Struggle though I do to avoid talk-ing clothes. I have lately found myself buying neckties that say "Countess Mara" or "Christian Dior" or something similarly commercial in large lettering. I don't really want to buy these ties, but can-not stop myself, any more than I can stop myself from wearing them.

I frankly admit to not knowing who I am. This is why I refuse to buy clothes that will tell people who I want them to think I am. It seems frighteningly possible, how-ever, that if one is not consciously dressing in talking clothes, then one's subconscious may take charge in an effort to tell him who

he really wants to be. If so, these neckties can mean but one thing: I want to be a bill-board. I believe this makes me what the politicians would call "a great American," depressing though it

The New York newspaper strike continues. This is a rerun of a 1975

That's the good news.
The bad news is that mankind hasn't figured out how to use even a portion of that energy to wide-scale benefit. But some en-

lton years.

wide-scale benefit. But some en-thusiasts say we're on the thresh-old of a Solar Age.

Short on sun but long on know-how, West Germany, shaken by the oil crisis of 1973-74, set out to make its contribution to that era. Today, it has bounded to the top of the burgeoning European solar indus-try, with about 500 producers and installers of solar collectors racking up sales of \$20 million in 1977 and expecting to triple that figure this year. France, meanwhile, has about a dozen companies, which totaled \$15 million in sales last year.

### Star Project

At the heart of West Germany's advances in solar technology is an intensive government-funded research and development program whose star project is the solar-heated sports complex recently completed in this tiny town 30 miles east of Cologne. It is the first large-scale soir pilot plant in the country and employs the largest solar collec-tor system of its kind in Europe. So important is what scientists expect to learn here that the U.S. Department of Energy is sharing

the costs through 1980.

The project's 1,100 solar panels are spread over 16,000 square feet atop the multi-purpose sports hall. They can beat four open-air swimming pools from

German woodcut from 1617.

# West Germany Looks to the Sun

May through September, supplying roughly 300,000 kilowatts of thermal energy during the period — and saving 38,000 liters of fuel oil. A second collector sys-tem. of 80 panels over t.070 square feet, provides heat for

Scientists have installed 200 data-collection points in the complex. They expect to learn. among other things, how much useful heat the widely varying. collectors can provide under different meteorological conditions. Their, research should establish criteria that will bring nearer the feasible collectors.

To that end, the government has earmarked for the 1977-80 period 166 million marks (about \$80 million) for solar R&D. more than three times the allotment for the previous three

As in the United States where the the Department of

Short on sun but long on know-how,

West Germany, shaken by the oil crisis

Energy is doubling (to \$500 million) its solar-research budget for fiscal 1980, and where President Carter's solar-installation tax incentive is expected to boost annual solar sales to \$1.5 billion - West Germany sees the best prospects for solar energy in heating and cooling. Since West Germany receives relative-ly little "useful" sun (about half the power density of North Africa. for instance), experts say its use for electricity-generation is not likely to attain the same level as it will for thermal use. Nor should it: Nearly half the country's energy usage is for heating and cooling houses and industry.

Equally as important as the local experiments on solar-col-lector performance are tests of certain innovations in energyconservation, such as the covers that are pulled over the four swimming pools at night, they will result, scientists predict, in an energy-saving of about 40 percent. And there is a pool filtering system that produces a further 20 percent reduction in water-heating requirements. The "waste heat" obtained from freezing an ice rink in winter will provide 70 percent of the heat needed for the huge sports ball here; the remaining 30 percent will come from well water and

Finally, the windows in the complex have been insulated with a double coating of tin oxide, which will reflect half of the heat back into the complex. The space between the panes has been filled with carbon dioxide to reduce heat transmission by convection. The result will be, say scientists, a heat loss 30 percent below that of normal win-

### Exploitable Market

While West Germany's solar at reducing its foreign-oil con-sumption, there is an overriding emphasis on exploiting a poten-tially mammoth export market for solar products. Twenty-three of the country's largest corpora-tions bave formed Bundesverband Solarenergie (BSE), an orpand Solarenergie (185E), an or-ganization that according to a brochure published in four lan-guages (including Arabic) aims to "promote cooperation with foreign countries." It notes the ability of small solar-power stations to supply electricity to out-of-the-way places" and to operate agricultural irrigation systems. Other solar uses, says BSE, include desalinizing seawater and supplying communica-tions networks in distant coun-

But Research and Technology Minister Volker Hauff is still cautious. He warns, echoing recent statements by U.S. Energy Secretary James Schlesinger, that "no excessive expectations should be cherished about the economic possibilities of exploitng solar energy."
Nevertheless, the sun has

great appeal as a source of energy - or at least a substantial supplementary source. It is clean, virtually inexhaustible— even romantic. It is something, Schlesinger has said, that "all people can intuitively appreci-ate. The problem, once experiments at Wiehl and elsewhere begin to bear fruit, may not be so much developing ever-more-refined solar technology as meet-

ing the public demand for it.
With the costs of other energy sources continuing to rise, solar could — some day, if not tomor-row — be the biggest thing under the sun.

U.S. Ambassador Kingman Brewster, right, is the guest of F Tindle for a ride in Mr. Tindle's 1904 Speedwell Dogo shown here crossing London's Westminster Bridge. About 7 cars manufactured before 1905 took part in the annual para

### Rumor Mills Grind PEOPLE: A Wedding for Charles

The latest rumor of possible mar-riage for Britain's Prince Charles had its origins Wednesday in the halls of Westminster when, the Sunday Times said, members of Parliament were gathered for the Queen's speech with too little to do while waiting. In circuitous fashion best understood by purveyors of rumors, mention of the mayor of Luxembourg City on a visit to Brit-ain linked with the Archbishop of Canterbury's unprecedented atten-dance at the installation of Pope John Pani II matched with the doubling of the Luxembourg budget for official uniforms resulted in the firm conviction among the MPs that Prince Charles is to marry Princess Marie-Astrid of Luxembourg. The reasoning was clear: the mayor had come to London to formalize wedding plans; the arch-bishop had been dispatched to clear up the problem of difference of religion with the new pope; and the uniforms were ready for immediate use. Unfortunately for lovers of royal weddings, t'was not so. The mayor of Luxembourg had not met in private audience with the queen as had been speculated; the archbishop met the pope in the company of at least 100 others; and

the uniform budget was raised last year, and for the army, not for

court staff, But all was not lost, the

Times concluded. Prince Charles is

to pay a visit to Brussels later this month. And there, taking a course,
